## SEC FORM 17-Q

### QUARTERLY REPORT PURSUANT TO SECTION 17 OF THE SECURITIES REGULATION CODE AND SRC RULE 17(2)(b) THEREUNDER

1. For the quarterly period ended  
Mar 31, 2019
  2. SEC Identification Number  
38683
  3. BIR Tax Identification No.  
000-315-612-000
  4. Exact name of issuer as specified in its charter  
THE PHILODRILL CORPORATION
  5. Province, country or other jurisdiction of incorporation or organization  
METRO MANILA, PHILIPPINES
  6. Industry Classification Code(SEC Use Only)
  7. Address of principal office  
8TH FLOOR, QUAD ALPHA CENTRUM 125 PIONEER ST., MANDALUYONG CITY  
Postal Code  
1550
  8. Issuer's telephone number, including area code  
(632) 6318151
  9. Former name or former address, and former fiscal year, if changed since last report  
N.A.
  10. Securities registered pursuant to Sections 8 and 12 of the SRC or Sections 4 and 8 of the RSA
- | Title of Each Class | Number of Shares of Common Stock Outstanding and Amount of Debt Outstanding |
|---------------------|---|
| COMMON SHARES       | 191,868,805,358   |
11. Are any or all of registrant's securities listed on a Stock Exchange?  
Yes          No  
If yes, state the name of such stock exchange and the classes of securities listed therein:  
PHILIPPINE STOCK EXCHANGE
  12. Indicate by check mark whether the registrant:

(a) has filed all reports required to be filed by Section 17 of the SRC and SRC Rule 17 thereunder or Sections 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of the

Corporation Code of the Philippines, during the preceding twelve (12) months (or for such shorter period that the registrant was required to file such reports)

Yes                  No

(b) has been subject to such filing requirements for the past ninety (90) days

Yes                  No

PART II – OTHER INFORMATION	18
SIGNATURES	18
INDEX TO FINANCIAL STATEMENTS AND SUPPLEMENTARY SCHEDULES	19

## PART 1 – FINANCIAL INFORMATION

### *Item 1. Financial Statements*

1. The unaudited Consolidated Financial Statements of the Company for the 1st quarter ended 31 March 2019 are included in this report. The schedules listed in the accompanying Index to Supplementary Schedules are filed as part of the SEC Form 17Q.
2. Interim Statements of Operations for the current interim period (01 January to 31 March 2019), with comparative Statement of Operations for the comparable period (01 January to 31 March 2018) are attached to this report.
3. A statement showing changes in equity cumulatively for the current financial year to date (01 January to 31 March 2019), with a comparative statement for the comparable year-to-date period of the immediately preceding financial year (01 January to 31 March 2018) are attached to this report.
4. The basic and diluted earnings/loss per share are presented on the face of the attached Statement of Operations (01 January to 31 March 2019), as well as the basis of computation thereof.
5. The Company's interim financial report for the 1st quarter 2019 is in compliance with Generally Accepted Accounting Principles ("GAAP"). Included in this report is a summary of the Company's significant accounting policies.
6. The Company follows the same accounting policies and methods of computation in its interim financial statements (01 January to 31 March, 2019) as compared with the most recent annual financial statements (2018), and no policies or methods have been changed. There were NO reclassifications of financial assets made into and from each category as of the current reporting period.
7. There were NO seasonal or cyclical aspects that had a material effect on the financial condition or results of interim operations of the Company.
8. There were NO unusual items during the interim period (01 January to 31 March 2019), the nature, amount, size or incidents of which have affected the assets, liabilities, equity, net income or cash flows of the Company.
9. There were NO changes in the estimates of amounts reported in prior financial year (2018), which had a material effect in the current interim period (01 January to 31 March, 2019).
10. There were NO issuances, repurchases and repayments of debt and equity securities during the current interim period (January 1 to March 31, 2019).

11. For the period January 1 to March 31, 2019, NO cash dividends were declared by the Board of Directors.
12. The Company does not generate revenues from a particular segment and its business is not delineated into segments, whether by business or geography. The Company is not required to disclose segment information in its financial statements.
13. Up to the time of filing of this quarterly report, there were NO material events subsequent to the end of the interim period (January 1 to March 31, 2019) that have not been reflected in the financial statements for said interim period.
14. There were NO changes in the composition of the Company during the interim period (January 1 to March 31, 2019) and there were NO business combinations, acquisition or disposal of subsidiaries and long-term investments, restructurings and discontinuance of operations during said interim period.
15. The Company has NO contingent liabilities or contingent assets as of its last annual balance sheet date (December 31, 2018) and as of end of current interim period (March 31, 2019), EXCEPT those disclosed in Note 25 to the Company's 2018 Audited Financial Statements.
16. There are NO material contingencies and any other events or transactions that are material to an understanding of the current interim period (January 1 to March 31, 2019).

***Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.***

**Financial Performance**

Total revenues for the first quarter ended March 31, 2019 decreased by P31.7 million or 30% to P73.2 million from P104.9 million for the same period last year. Petroleum revenues decreased by P34.9 million or 36% to P62.6 million from P97.5 million for the same period last year. The decrease was brought mainly by the decrease in production volume for the first quarter of 2019 as compared to the same period last year. The combined gross production decreased to 213,619 barrels for the first quarter ended March 31, 2019, from 332,960 barrels produced for the same period last year. The average price per barrel increased to \$67.53 for the period ended March 31, 2019 as compared to \$66.34 for the same period last year. Equity in net earnings of associates increased by P2.2 million. Interest income also increased by P1.2 million. Foreign exchange loss amounted to P0.6 million for the first quarter of 2019 as compared to foreign exchange gain of P22.5 million for the same period last year.

Total costs and expenses including foreign exchange gains/losses decreased by P15.8 million from P92.9 million for the first quarter of 2018 to P77.1 million for the first quarter of 2019. Operating costs decreased by 35%. For 2018, plug and abandonment costs for the Libro and Tara wells were incurred, the company's share amounted to P7.1 million as of March 31,

2018. The company's net income after tax amounted to P9.0 million for the first quarter of 2019 as compared to P8.4 million for the same period last year.

The Company's top five (5) key performance indicators are as follows:

	March 31, 2019	December 31, 2018
Current Ratio	9.72 : 1	6.13 : 1
Current Assets	855,872,691	918,114,898
Current Liabilities	88,019,689	149,872,056
Debt to Equity Ratio	0.04 : 1	0.05 : 1
Total Liabilities	120,172,804	180,961,421
Stockholders Equity	3,316,283,530	3,299,371,784
Equity to Debt Ratio	27.60 : 1	18.23 : 1
Stockholders Equity	3,316,283,530	3,299,371,784
Total Liabilities	120,172,804	180,961,421
Book Value per Share	0.0173	0.0172
Stockholders Equity	3,316,283,530	3,299,371,784
Shares outstanding	191,868,805,358	191,868,805,358
Earnings per Share	0.000047	0.000044
Net Income*	9,044,880	8,374,404
Weighted ave. no. of shares	191,868,805,358	191,868,805,358

*\*for the period January 1 to March 31*

The current ratios as of December 31, 2018 and March 31, 2019 are 6.13:1 and 9.72:1, respectively. The Company's current assets exceeded its current liabilities by P767.8 million and P768.2 million as of March 31, 2019 and December 31, 2018, respectively. The "Financial assets at fair value through other comprehensive income (FVOCI)" account in the balance sheet consists of shares of stock which are listed with the Philippine Stock Exchange and which could be sold to meet the Company's obligations as might be called for by future circumstances. These shares of stock had an aggregate market value of P84.7 million as of March 31, 2019 and P74.2 million as of December 31, 2018. If these shares would be considered part of Current Assets, the recomputed current ratio would be 10.69:1 as of March 31, 2019 and 6.62:1 as of December 31, 2018.

Total assets decreased from P3.480 billion as of December 31, 2018 to P3.436 billion as of March 31, 2019. Cash and cash equivalents reflected a net decrease of P38.6 million or 7% due to the payment of company's share in operating expenses of Galoc, and plug and abandonment costs of Nido, Matinloc and North Matinloc wells. Receivables increased by P14.9 million, due to accrual of trade and other receivables at end of the interim period. Crude oil inventory decreased by P38.2 million or 46% due to lower volume of crude oil on storage as of March 31, 2019. Other current assets decreased by P0.4 million due to the amortization of prepaid expenses. Property and equipment reflected a decrease of P14.1 million to P475.7 million as of March 31, 2019 mainly due to the booking of depletion and depreciation costs. Financial assets at FVOCI increased by P10.5 million due to the adjustment in the valuation reserve of the company's listed stock investments. Deferred oil exploration costs increased by P2.2 million due to additional project costs. Deferred tax assets increased by P13.9 million or 11% due to adjustments in the recognition of deferred tax assets as of end of the interim

period. Other noncurrent assets increased by P0.8 million due to additional deferred costs booked during the interim period.

Total liabilities decreased by 34% or P60.79 million from P181.0 million as of December 31, 2018 to P120.2 million as of March 31, 2019 mainly due to the payment of cash calls on accrued plug and abandonment costs during the interim period.

Stockholders' equity increased by P16.9 million from P3.299 billion as of December 31, 2018 to P3.316 billion as of March 31, 2019. For the first quarter, an adjustment for the decline in value of financial assets at FVOCI of P7.9 million in the valuation reserve of the company's listed stock investments was booked. As of March 31, 2019, net unrealized loss on the decline in value of financial assets at FVOCI amounted to P24.1 million as compared to P31.9 million as of December 31, 2018. The company's retained earnings amounted to P1.597 billion as of March 31, 2019 as compared to P1.588 billion as of December 31, 2018.

The Company has a majority-owned subsidiary, Philodrill Power Corporation (PPC) (formerly Phoenix Gas & Oil Exploration Co., Inc.). The Company acquired 100% of its capital stock in May 2007. Since PPC has NOT yet started commercial operations, disclosure on performance indicators are as follows:

	March 31, 2019	December 31, 2018
Current Ratio	773.02 :1	194.42 :1
Current Assets	8,657,781	8,710,208
Current Liabilities	11,200	44,800
Debt to Equity Ratio	0.001 :1	0.005 :1
Total Liabilities	11,200	44,800
Stockholders' Equity	8,646,581	8,665,408
Equity to Debt Ratio	772.02 :1	193.42 :1
Stockholders' Equity	8,646,581	8,665,408
Total Liabilities	11,200	44,800
Book Value per Share	0.000691	0.000693
Stockholders Equity	8,646,581	8,665,408
Average shares outstanding	12,505,000,000	12,505,000,000
Income (loss) per Share	-	-
Net Income (Loss)	No operation	No operation
Average shares outstanding	12,505,000,000	12,505,000,000

#### Discussion and Analysis of Material Events and Uncertainties

In general, Management is not aware of any material event or uncertainty that has affected the current interim period and/or would have a material impact on future operations of the Company. The Company will continue to be affected by the Philippine business environment as may be influenced by any local/regional financial and political crises.

1. There are NO known trends, demands, commitments, events or uncertainties that have or are reasonably likely to have material impact on the Company's liquidity.

Should the Company's cash position be not sufficient to meet current requirements, the Company may consider:

- a) collecting a portion of Accounts Receivables;
  - b) selling a portion of its existing investments and assets;
  - c) generating cash from loans and advances; and
  - d) issuing subscriptions call on the balance of the subscriptions receivable.
2. There are NO events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation.
  3. There are NO material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period, EXCEPT those disclosed in Note 25 to the Company's 2018 Audited Financial Statements.
  4. The Company has NO material commitments for capital expenditures, except for the Company's share in the exploration and development expenditures in the SCs and GSECs. The Company expects to be able to fund such expenditures from: operations, collection of subscriptions and other receivables, and from loans/financing, or to avoid incurring these expenditures altogether by way of farm-outs.
  5. There are NO known trends, events or uncertainties that have had or are reasonably expected to have a material impact on the revenues or income of the Company from continuing operations.
  6. There are NO significant elements of income or loss that did not arise from the Company's continuing operations.
  7. There have been NO material changes from period to period in one or more line items of the Company's financial statements, except those discussed below:

Cash and cash equivalents reflected a net decrease of P38.6 million or 7% due to the payment of company's share in operating expenses of Galoc and plug and abandonment costs of Nido, Matinloc and North Matinloc wells.

Receivables increased by P14.9 million, due to accrual of trade and other receivables at end of the interim period.

Crude oil inventory decreased by P38.2 million or 46% due to the lower volume of crude oil on storage as of end of the interim period.

Other current assets decreased by P0.4 million due to the amortization of prepaid expenses booked during the interim period.

Property and equipment reflected a decrease of P14.1 million to P475.7million as of March 31, 2019 due to the booking of depletion and depreciation costs.

Financial assets at FVOCI increased by ₱10.5 million or 14% due to the adjustment in the valuation reserve of the company's listed stock investments.

Deferred tax assets increased by ₱13.9 million or 11% due to adjustments in the recognition of deferred tax assets as of end of the interim period.

Accounts payable and accrued liabilities reflected a ₱4.0 million decrease due to the payment of accrued expenses during the interim period.

Current portion of the provision for plug and abandonment costs decreased by ₱58.1 million or 55% due the payment of cash calls made during the interim period.

Income tax payable reflected an increase of ₱0.25 million due to the accrual of income tax during the interim period.

Retirement benefit liability increased by ₱1.1 million or 11% mainly due the booking of additional pension liability as of the end of the interim period.

Net unrealized loss on the decline in value of financial assets at FVOCI as of December 31, 2018 amounted to ₱32.0 million. For the interim period, ₱7.9 million adjustment in the valuation reserve pertaining to the listed stock investments of the Company was booked. As of March 31, 2019, net unrealized loss on the decline in market value of financial assets at FVOCI amounted to ₱24.1 million.

The company's retained earnings amounted to ₱1.597 billion as of March 31, 2019 as compared to ₱1.588 billion as of December 31, 2018. The increase of ₱9.0 million was due to the net income booked for the first quarter of 2019.

Petroleum revenues decreased by ₱34.9 million or 36% to ₱62.6 million from ₱97.5 million for the same period last year due to lower production volume. The combined gross production decreased to 213,619 barrels for the first quarter ended March 31, 2019 from 332,960 barrels produced for the same period last year. The average price per barrel increased to \$67.53 for the period ended March 31, 2019 as compared to \$66.34 per barrel for the same period last year.

Equity in net earnings of associates increased by ₱2.2 million or 70% due to the higher level of income booked by affiliates.

Interest income increased by ₱1.2 million from ₱3.3 million to ₱4.5 million for the first quarter ended March 31, 2019.

Foreign exchange loss amounted to ₱0.64 million for the first quarter of 2019 as compared to foreign exchange gain of ₱22.5 million for the same period last year. For the first quarter of 2019, foreign exchange loss of ₱0.64 million was brought

about by the ₱0.08 appreciation in the reference rates from ₱52.58 to ₱52.50 as of December 31, 2018 and March 31, 2019, respectively. While for the previous first quarter of 2018, foreign exchange gain of ₱22.5 million was brought about by the ₱2.23 depreciation in the reference rates from ₱49.93 to ₱52.16 as of December 31, 2017 and March 31, 2018, respectively.

Other income decreased by ₱0.1 million due to lower level of miscellaneous income booked during the period.

Share in costs and operating decreased by ₱32.1 million or 35% due to lower level of production costs booked during the first quarter of 2019. For 2018, plug and abandonment costs for the Libro and Tara wells were incurred. The company's share in these costs amounted to ₱7.1 million as of March 31, 2018.

Net income amounted to ₱9.0 million for the first quarter of 2019, as compared to ₱8.4 million for the same period last year.

8. There are NO seasonal aspects that had material effect on the financial condition or results of operations.

### ***Item 3. Management's Assessment and Evaluation of Financial Risk Exposures***

#### **A. Financial Instruments**

Since there were NO financial assets reclassified into and from each category, disclosures on the following are:

- a. The financial assets reclassified into and from each category; - Not Applicable
- b. For each reporting period until derecognition, the carrying amounts and fair values of all financial assets reclassified in the current reporting period and previous reporting periods;- Not Applicable
- c. For financial assets reclassified in rare circumstances, the facts that would establish such kind of circumstances; -Not Applicable
- d. In the reporting period to which financial assets are reclassified, the fair value of the gains or losses of those assets as recognized either in profit or loss, or in equity (other comprehensive income) in that reporting period and previous reporting periods;- Not Applicable
- e. For the remainder of the instruments' lives, the gains or losses that would have been recognized in profit or loss, or equity had they not been reclassified, together with the gains, losses, income and expenses now recognized;-Not Applicable

- f. As at date of reclassification, the effective interest rates and estimated of cash flows the company expects to recover. – Not Applicable

#### Fair Values of Financial Instruments

The following table shows the carrying amounts and fair values of the Group's financial assets and financial liabilities:

	Consolidated Unaudited March 2019	Consolidated Unaudited March 2019	Consolidated Audited December 2018	Consolidated Audited December 2018

Quoted AFS investments are carried at fair value based on the quoted values of the securities.

#### B. Financial Risk Management Objectives and Policies

##### Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise mainly of cash and cash equivalents, receivables (except accounts with contract operators and advances to officers and employees), financial assets at FVOCI, other noncurrent assets, accounts payables and accrued liabilities (except withholding taxes) and dividends payable. The main purpose of these financial instruments is to provide financing for the Group's operations and capital intensive projects.

The Board of Directors (BOD) is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

The main risks arising from the Group's financial instruments are credit risks, liquidity risk, and market risks. The market risks exposure of the Group can be further classified to foreign currency risk and equity price risk. The BOD reviews and approves the policies for managing some of these risks and they are summarized as follows:

Credit risks

Credit risk is the possibility of loss for the Group if its receivable counterparties fail to discharge their contractual obligations. With respect to credit risk arising from the other financial assets of the Group, which comprise of cash in banks, short term investments, receivables and financial assets at FVOCI, advances to related parties, the Group's exposure to credit risk could arise from default of the counterparty.

The Group trades only with recognized, creditworthy third parties. However, the Group's credit risk exposure is concentrated on a few counterparties as inherent in the oil exploration and production business.

As of March 31, 2019, all of the outstanding trade receivables are from the SC14 A, B & C-1 consortiums. At present, the SC14 A&B consortium has a supply agreement with Pilipinas Shell Petroleum Corporation (Pilipinas Shell), assuring Pilipinas Shell with sale of the SC14 A&B consortium's petroleum products. For SC14 C-1 consortium, the operator, Galoc Production Company has a crude agency agreement with Vitol Asia Pte. Ltd. for the marketing of the Galoc production.

The table below summarizes the Group's gross maximum credit risk exposure from its financial instruments. These amounts are gross of collateral and credit enhancements, but net of any amounts offset and allowance for impairment losses:

	Unaudited balances as of March 31, 2019
Loans and receivables	
Cash and cash equivalents	498,034,261
Advances to related companies	193,934,601
Accounts with contract operators and partners	1,118,530
Accrued interest	35,676,448
Other noncurrent assets	9,528,791
Financial assets at FVOCI	84,732,493
Gross maximum credit risk exposure	823,025,124

The table below shows the credit quality of the Group's financial assets by class as of March 31, 2019 based on the Group's credit evaluation process:

			Past due but not impaired				
	Neither past due nor impaired High Grade	Neither past due nor impaired Standard Grade	1-30 days	31-90 days	Over 90 days	Impaired Financial Assets	Total
Loans and receivables							
Cash and cash equivalents	498,034,261						498,034,261

Advances to related companies	188,125,000				1,055,839	4,753,762	193,934,601
Accounts with partners	788,942				329,588		1,118,530
Accrued interest			499,799	1,083,926	17,926,288	16,166,436	35,676,448
Other noncurrent assets	9,528,791						9,528,791
Financial assets at FVOCI	84,732,493						84,732,493
Total	781,209,487		499,799	1,083,926	19,311,714	20,920,198	823,025,124

Credit quality of cash and cash equivalents, receivables and AFS financial assets are based on the nature of the counterparty.

“High grade” credit quality financial assets pertain to financial assets with insignificant risk of default based on historical experience and/or counterparty credit standing. “Standard grade” credit quality financial assets are not yet past due, yet are from counterparties with a history of default. However, the Group cannot declare any of these amounts as uncollectible because they arise from related companies for which there is a common control.

“Past due but not impaired” are items which are already past their maturity dates, but the amount due is still judged as collectible by the Group based on its assessment of the age and creditworthiness of the counterparties. Lastly, “Impaired financial assets” are those that are long-outstanding and has been provided with allowance for impairment losses.

#### Liquidity risk

Liquidity risk is the risk where the Group becomes unable to meet its payment obligations when they fall due under normal and stress circumstances. The Group’s objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and operating cash flows. The Group addresses liquidity concerns primarily through cash flows from operations and short-term borrowings.

The table below summarizes the aging analyses of the Group’s financial assets as of March 31, 2019 that is used to manage the liquidity risk of the Company:

	Less than three months	Three to twelve months	Total
Cash and cash equivalents	498,034,261	0	498,034,261
Receivables			
Advances to related parties	188,145,000	5,809,601	193,934,601
Accounts with partners	1,118,530		1,118,530
Accrued interest	19,510,013	16,166,435	35,676,448
Other noncurrent assets	9,528,791		9,528,791
AFS financial assets	84,732,493	0	84,732,493
	801,069,088	21,976,036	823,025,124

The table below summarizes the maturity profile of the Group’s accounts payable, accrued liabilities and dividends payable based on contractual undiscounted payments.

	Less than three months	Three to twelve months	Total
March 31, 2019	40,417,122		40,417,122

Market Risk

Market risk is the risk of loss to future earnings, to fair values or to future cash flows that may result from changes in the price of a financial instrument. The value of a financial instrument may change as a result of changes in foreign currency exchange rates and equity price.

Foreign currency risk

Foreign currency risk is the risk that the value of the Group's financial instruments diminishes due to unfavorable changes in foreign exchange rates. The Group's transactional currency exposures arise from cash and cash equivalents and receivables. The Parent Company's entire share in petroleum operations revenue is denominated in United States Dollar (USD). Consequently, the Group is exposed to foreign exchange risk arising from its USD-denominated receivables and cash and cash equivalents.

As of March 31, 2019, the exchange rate of the Philippine peso to the US\$ is ₱52.50 to US\$1.00.

Equity price risk

Equity price risk is the risk that the fair values of investments in quoted equity securities could decrease as a result of changes in the prices of equity indices and the value of individual stocks. The Group is exposed to equity securities price risk because of investments held by the Parent Company, which are classified in the consolidated statements of financial position as AFS financial assets.

PETROLEUM PROJECTS1.0 Service Contract 6A (Octon)

The Department of Energy (DOE) approved on 23 January 2019 the Work Program & Budget (WP&B) for the Octon Block for 2019. The proposed activities include seismic attribute study on the northern block of the SC aimed at maturing a potential drilling location for an exploratory well, preparing a preliminary well design and proposal as well as scoping project economics. Operator Philodrill aims to be able to identify a possible well location at the central fault block of the West Malajon-Salvacion-Saddle Rock anticlinorium within the current program.

The Octon Block Joint Venture is also currently evaluating an offer by a potential farminee to undertake high-level technical and economic studies on the Octon discovery. Following the preliminary discussions, the farminee has submitted a work plan of activities anchored on the formulation of a Field Development Plan for the Octon Discovery which the JV approved to adopt and submitted to the DOE for approval as a supplemental CAPEX to the DOE-approved 2019 SC 6A WP&B. A draft farm-in agreement has been crafted and currently being negotiated by the farminee and the SC 6A JV. Consortium partner PetroEnergy was designated to negotiate the commercial aspect of the farm-in.

## **2.0     Service Contract 6B (Bonita)**

The DOE continues with the technical, legal and financial evaluation of the documents that Philodrill and Manta Oil Company Limited have submitted regarding the requested approval of the transfer of 70% participating interest and the operatorship of SC 6B to Manta Oil.

We have written the DOE in February informing them of the SC 6B JV's decision to put on hold the submission of a separate work program different to what Manta Oil has proposed and submitted under the farm-in. Philodrill and the JV partners all agreed that submitting an alternate WP&B will only be appropriate should the DOE disapprove the interest assignment, transfer of operatorship and the submitted WP&B by Manta.

## **3.0     Service Contract No. 14 (Nido/Matinloc)**

Philodrill completed the final lifting from the Nido Field on March 12, bringing the total field production for 2019 to 20,620 barrels. The field's total cumulative production was 18,917,419 barrels since the field first produced on February 1, 1979. The Matinloc Field had earlier ceased commercial production on February 10, 2019 with the final cumulative production of 12,582,589 barrels. The Matinloc Field first produced on July 21, 1982.

Philodrill has contracted the P&A of the nine (9) production wells in SC 14 A&B to CWT Consultancy Limited which had successfully plugged the Libro and Tara South wells in May last year. The workboat MV ENA Habitat that will assist in the P&A work is scheduled for mobilization from Singapore on 30 March 2019. Meanwhile, Philodrill has been coordinating the inspection of the platforms by DOE representatives as part of the Department's process in determining the final disposition of the SC 14 field platforms and equipment.

## **4.0     Service Contract No. 14 C-1 (Galoc)**

The Galoc Field produced 185,761 barrels (as of March 28<sup>th</sup>) during the first quarter of 2019, a significant drop from the previous quarter's output of 269,025 barrels. This is largely attributed to the decline in production performance of the Galoc-3 well that is now under cyclic production mode, as well as to the continued shut-in of the Galoc-4 well since mid-January due to problems in the well's subsurface production mechanism which operator GPC continues to investigate and resolve. As of end-March 2019, an inventoried volume of about 183,840 barrels remain on board the FPSO Rubicon Intrepid after GPC completed one crude oil shipment in January.

Following Tamarind's assumption of operatorship and control of the Galoc Field in July 2018, the company started to investigate and implement various programs aimed at improving production performance. Tamarind has also secured Galoc JV partners approval for the installation of a condensate recovery unit (CRU) at the Galoc FPSO to recover the condensate from the gas production at Galoc. The operator have negotiated a contract with technology provider NGLTech for the design and manufacture of the CRU module which will be installed in the second quarter of 2019. Tamarind had also negotiated for the sale of future Galoc cargoes to exclusive buyer Trafigura, through Vitol, starting with the next offtake scheduled in August – September 2019.

## **5.0     Service Contract No. 14 C-2 (West Linapacan)**

The DOE approved the 2019 WP&B for the block, the major component of which is the joint Quantitative Interpretation (QI) re-processing program with the SC 74 JV of the seismic volume covering the West Linapacan A and B in SC 14 C-2 and the Linapacan A and B in SC 74. Immediately after securing JVs' approval of the joint program, the respective block operators (Philodrill for SC 14 C-2 and PXP Energy for SC 74) worked on and have started to negotiate with the services provider IKON Science. The QI work will cover the adjacent areas of the 2 blocks, the cost of which shall be shared by the two consortia. Philodrill and PXP Energy, meanwhile, have prepared the data requirements for the joint QI work which is anticipated to commence as soon as the agreement with IKON Science is finalized and signed.

Early this year, Philodrill received expressions of interest for the re-development of the West Linapacan A (WLA) field from 2 international firms. The first, a British company incorporated in the British Virgin Islands, has expressed their intention to be a part of the joint venture and become the operator of the SC for the re-development of the WLA field. The company submitted separate Non-Binding Offers to the JV partners willing to divest their interests in West Linapacan Block via farm-out or by outright acquisition of the sale of their working interests on the block. Philodrill opted for both partial sale of its interests and divestment through farm-out. A confidentiality agreement with the potential farminee has been executed to provide them data access for their due diligence work.

Baker Hughes GE (BHGE) also indicated their interest to do a technical study on the re-development of the WLA Field. Similarly, a non-disclosure agreement was signed and executed with BHGE providing them confidential access to West Linapacan data to evaluate feasible re-development options that they can eventually propose to the joint venture.

## **6.0     Service Contract No. 53 (Onshore Mindoro)**

There has been no update from block operator Mindoro-Palawan Oil & Gas Inc. (MPOGI) as to their plans for the block, specifically the activities to execute the Joint Venture's commitments including the drilling of Progreso-2. The DOE had already instructed MPOGI to secure a Certificate of Pre-Condition from the National Commission on Indigenous Peoples (NCIP) which will enable the lifting of the moratorium, thus allowing the conduct of drilling activities in SC 53.

For its part, Philodrill extended help to Gas2Grid, the operator of SC 44 in onshore Cebu, which earlier indicated interests on the Progreso project through possible drill-for-equity arrangement with the Onshore Mindoro JV. To date, MPOGI has yet to advise the JV on the status of their negotiations with Gas2Grid. Earlier this March, MPOGI disclosed that it is also entertaining the expression of interest by a Norwegian company, Gannet Drilling, regarding a possible farm-in to Onshore Mindoro Block.

#### **7.0     Service Contract No. 74 (Linapacan)**

The DOE approved on January 7, 2019 the Linapacan Block WP&B for 2019. A major component of the approved work is the conduct of a joint QI work on a 400 sq km reprocessed PSDM seismic data volume covering the West Linapacan A and B in SC 14 and the Linapacan A and B in SC 74. As earlier mentioned in this report, Philodriil and PXP are negotiating a service agreement with potential contractor IKON Science to firm up the methodology and data requirements for the proposed QI work. Also approved is the integration of the results of the gravity and magnetic modelling with the MC2D seismic interpretation and the completion of the remaining studies from the previous year.

#### **8.0     SWAN Block (Deepwater Northwest Palawan)**

There are no significant developments to report on the SWAN Block from the previous quarter.

**PART II – OTHER INFORMATION**

There were NO items for disclosure that were not made under SEC Form 17C during the current interim period (01 January to 31 March 2019).

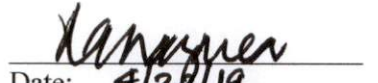

**SIGNATURES**

Pursuant to the requirements of Securities Regulation Code, the registrant has caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Debt to equity ratio	0.04 :1	0.05 :1

# **1. Basis of Preparation, Basis of Consolidation, Statement of Compliance, Changes in Accounting Policies and Disclosures, Summary of Significant Accounting Policies and Financial Reporting Practices**

## Basis of Preparation

The consolidated financial statements of the Group have been prepared on a historical cost basis, except for crude oil inventory which is valued at net realizable value (NRV), financial assets at FVOCI and quoted AFS financial assets which are measured at fair value. The consolidated financial statements are presented in Philippine Peso, which is the Parent Company's and its subsidiary's functional and presentation currency, rounded off to the nearest peso, except when otherwise indicated.

The consolidated financial statements provide comparative information in respect of the previous period.

## Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Group as at December 31 of each year, after eliminating intercompany balances and transactions. The financial statements of the subsidiary are prepared for the same reporting year as the Parent Company using consistent accounting policies. Control is achieved when the Parent Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The Parent Company controls an investee if and only if the Parent Company has all of the following:

- Power over the investee;
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect the amount of the Parent Company's returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Parent Company has less than a majority of the voting or similar rights of an investee, the Parent Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Parent Company's voting rights and potential voting rights.

The Parent Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of income from the date the Parent Company gains control until the date the Parent Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent of the Group. When necessary, adjustments are made to the financial statements of the subsidiary to bring its accounting policies into line with the Parent Company's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Parent Company loses control over a subsidiary, it:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- Derecognizes the carrying amount of any non-controlling interests;
- Derecognizes the cumulative translation differences recorded in equity;
- Recognizes the fair value of the consideration received;
- Recognizes the fair value of any investment retained;
- Recognizes any surplus or deficit in profit or loss; and
- Reclassifies the Parent Company's share of components previously recognized in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Parent Company had directly disposed of the related assets or liabilities.

## Statement of Compliance

The consolidated financial statements of the Group have been prepared in compliance with the Philippine Financial Reporting Standards (PFRS).

## Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except that the Group has adopted the following new accounting pronouncements starting January 1, 2018. Adoption of these pronouncements did not have any significant impact on the Group's financial position or performance unless otherwise indicated.

- Amendments to PFRS 2, *Share-based Payment, Classification and Measurement of Share-based Payment Transactions*
- PFRS 9, *Financial Instruments*

PFRS 9 Financial Instruments replaces PAS 39 *Financial Instruments: Recognition and Measurement* for annual periods beginning on or after January 1, 2018, bringing together all three aspects of the accounting for financial instruments: classification and measurement; impairment; and hedge accounting.

The Group applied PFRS 9 prospectively, with an initial application date of January 1, 2018. The Group has not restated the comparative information, which continues to be reported under PAS 39. Difference arising from the adoption of PFRS 9 has no material impact, thus has not been recognized.

a. *Classification and measurement*

Under PFRS 9, debt instruments are subsequently measured at fair value through profit or loss (FVTPL), amortized cost, or FVOCI. The classification is based on two criteria: the Group's business model for managing the assets; and whether the instruments' contractual cash flows represent 'solely payments of principal and interest' on the principal amount outstanding.

The assessment of the Group's business model was made as of the date of initial application, January 1, 2018. The assessment of whether contractual cash flows on debt instruments are solely comprised of principal and interest was made based on the facts and circumstances as at the initial recognition of the assets.

The classification and measurement requirements of PFRS 9 did not have a significant impact on the Group. The Group continued measuring at fair value all financial assets previously held at fair value under PAS 39. The following are the changes in the classification of the Group's financial assets:

- Cash and cash equivalents, receivables and other noncurrent assets previously classified as loans and receivables as at December 31, 2017 are held to collect contractual cash flows and give rise to cash flows representing solely payments of principal and interest. These are classified and measured as financial assets at amortized cost beginning January 1, 2018.
- Listed equity investments previously classified as AFS financial assets are now classified and measured as FVOCI. The Group elected to classify irrevocably its listed equity investments under this category as it intends to hold these investments for the foreseeable future. There were no impairment losses recognized in profit or loss for these investments in prior periods.

The Group has not designated any financial liabilities as at FVTPL. There are no changes in classification and measurement for the Group's financial liabilities.

b. *Impairment*

The adoption of PFRS 9 has fundamentally changed the Group's accounting for impairment losses for financial assets by replacing PAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. PFRS 9 requires the Group to recognize an allowance for ECLs for all debt instruments not held at FVTPL and contract assets.

Upon adoption of PFRS 9, impairment losses did not reduce the carrying amount of the Group's cash and cash equivalents and receivables as at January 1, 2018.

c. *Hedge accounting*

The Group has no existing hedge relationships as at December 31, 2017, thus will not have an impact on the consolidated financial statements of the Group.

- Amendments to PFRS 4, *Applying PFRS 9 Financial Instruments with PFRS 4 Insurance Contracts*
- PFRS 15, *Revenue from Contracts with Customers*

PFRS 15 supersedes PAS 18 Revenue and related Interpretations and it applies, with limited exceptions, to all revenue arising from contracts with its customers. PFRS 15 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

PFRS 15 requires entities to exercise judgment, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

The Group is a member of various jointly controlled operations in oil drilling. These jointly controlled operations are entered into within the Philippine Government through Service Contracts. The Group holds different participating interests to these Service Contracts. The Group's sale of petroleum products is out of scope of PFRS 15 since the Group is recognizing its revenue on the basis of its entitlement from the sale of its joint operations with other consortium members which is in accordance of par. 20(c) of *PFRS 11, Joint Arrangements* which states "A joint operator shall recognize in relation to its interest in a joint operation its share of the revenue from the sale of the output by the joint operation".

The Group assessed that the adoption of PFRS 15 has no material impact since the Group's main source of revenues is from its share in revenue from the joint operation. Under PFRS 15, an entity shall apply the new standard to all contracts with customers, except for contractual rights and obligations that are within the scope of PFRS 11.

Furthermore, the Group assessed that the adoption of PFRS 15 has an impact on the recognizing revenue from share on the ending inventory of the consortium. Prior to adoption of PFRS 15, the Group recognize the share on the ending inventory as revenue. And upon adoption of PFRS 15, the share is charged against share in costs and operating expenses. Hence, the beginning inventory is recognized as revenue for the current year and charged against share in cost and operating expenses.

- Amendments to PAS 28, *Investments in Associates and Joint Ventures, Measuring an Associate or Joint Venture at Fair Value* (Part of *Annual Improvements to PFRSs 2014 - 2016 Cycle*)
- Amendments to PAS 40, *Investment Property, Transfers of Investment Property*
- Philippine Interpretation IFRIC-22, *Foreign Currency Transactions and Advance Consideration*

#### Standards and Interpretations Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its financial statements. The Group intends to adopt the following pronouncements when they become effective.

#### *Effective beginning on or after January 1, 2019*

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*  
Under PFRS 9, a debt instrument can be measured at amortized cost or at FVOCI, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. The amendments should be applied retrospectively and are effective from January 1, 2019, with earlier application permitted.

These amendments have no impact on the consolidated financial statements of the Group.

- PFRS 16, *Leases*  
PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17.

A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Group is currently assessing the impact of adopting PFRS 16.

- *Amendments to PAS 19, Employee Benefits, Plan Amendment, Curtailment or Settlement*  
The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in OCI.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019, with early application permitted. These amendments have no impact on the consolidated financial statements of the Group.

- *Amendments to PAS 28, Long-term Interests in Associates and Joint Ventures*  
The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the ECL model in PFRS 9 applies to such long-term interests.

The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28.

The amendments should be applied retrospectively and are effective from January 1, 2019, with early application permitted. The Group is currently assessing the impact of adopting PAS 28.

- *Philippine Interpretation IFRIC-23, Uncertainty over Income Tax Treatments*  
The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, Income Taxes, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

This interpretation is not relevant to the Group because there is no uncertainty involved in the tax treatments made by management in connection with the calculation of current and deferred taxes as of December 31, 2018 and 2017.

- *Annual Improvements to PFRSs 2015-2017 Cycle*
  - Amendments to PFRS 3, *Business Combinations*, and PFRS 11, *Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019 and to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments are currently not applicable to the Group but may apply to future transactions.

- Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*  
The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, OCI or equity according to where the entity originally recognized those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application is permitted. These amendments are not applicable to the Group.

- Amendments to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*  
The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted.

Since the Group's current practice is in line with these amendments, the Group does not expect any effect on its consolidated financial statements upon adoption.

#### *Effective beginning on or after January 1, 2020*

- Amendments to PFRS 3, *Definition of a Business*  
The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.  
An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*  
The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgments.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

#### *Effective beginning on or after January 1, 2021*

- PFRS 17, *Insurance Contracts*  
PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

#### *Deferred effectivity*

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*  
The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

#### Summary of Significant Accounting Policies and Financial Reporting Practices

##### Presentation of Financial Statements

The Group has elected to present all items of recognized income and expense in two statements: a statement displaying components of profit or loss in the consolidated statement of income and a second statement beginning with profit or loss and displaying components of OCI in the consolidated statement of comprehensive income.

##### Cash and Cash Equivalents

Cash includes cash on hand and with banks. Cash equivalents are short-term investments made for varying periods of up to three (3) months depending on the immediate cash requirements of the Group and earn interest at the respective short-term cash investment rates.

##### Financial Instruments – initial recognition and subsequent measurement effective January 1, 2018

##### Financial assets

##### Initial Recognition and Measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value FVOCI, and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. The Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are "solely payment of principal and interest (SPPI)" on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets that refers to how it manages its financial assets in order to generate cash flows. The business model determine whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchase or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

##### Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses upon derecognition (debt instruments)
- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon recognition (equity instruments)
- Financial assets at FVTPL

*Financial assets at amortized cost*

This category is the most relevant to the Group. The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on a specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost includes cash and cash equivalents and receivables (except advances to officers and employees).

*Financial assets at FVOCI (debt instruments)*

The Group measures debt instruments at FVOCI if both of the following conditions are met:

- The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at FVOCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the consolidated statement of income and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value changed in OCI is recycled to profit or loss.

The Group does not have debt instruments at FVOCI.

*Financial assets designated at FVOCI (equity instruments)*

Upon initial recognition, the Group can elect to classify irrevocably its equity instruments as equity instruments designated at FVOCI when they meet the definition of equity under PAS 32, *Financial Instruments: Presentation* and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the consolidated statement of income when the right to payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at FVOCI are not subject to impairment assessment.

The Group's financial assets at FVOCI includes investment in quoted equity instruments.

*Financial assets at FVTPL*

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVOCI, as described above, debt instruments may be designated at FVTPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at FVTPL are carried in the consolidated statement of financial position at fair value with net changes in fair value recognized in the consolidated statement of income.

A derivative embedded in a hybrid contract with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risk are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at FVTPL. Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

*Derecognition*

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or

- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

#### *Impairment of Financial Assets*

The Group recognizes an allowance for ECLs for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original EIR. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For financial assets such as advances to related parties, accrued interest, accounts with partners, ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For cash and cash equivalents, the Group applies the low credit risk simplification. The probability of default and loss given defaults are publicly available and are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The key inputs in the model include the Group's definition of default and historical data of three years for the origination, maturity date and default date. The Group considers accounts with contract operators in default when contractual payment are 90 days past due, except for certain circumstances when the reason for being past due is due to reconciliation with customers of payment records which are administrative in nature which may extend the definition of default to 90 days and beyond. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

#### *Determining the stage for impairment*

At each reporting date, the Group assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Group considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The Group considers that there has been a significant increase in credit risk when contractual payments are more than 90 days past due.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the loss allowance measurement reverts from lifetime ECL to 12-months ECL.

#### *Financial liabilities*

##### *Initial measurement and recognition*

Financial liabilities are classified, at initial recognition, as financial assets at fair value through profit or loss, loans and borrowings, payables, or as designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of attributable transaction costs.

The Group's financial liabilities include trade and other payables.

*Subsequent measurement*

The measurement of financial liabilities depends on their classification, as described below:

*Financial liabilities at FVTPL*

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by PFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the consolidated statement of income.

Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria in PFRS 9 are satisfied. The Group has not designated any financial liability as at FVTPL.

*Loans and borrowings*

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the consolidated statement of income.

This category generally applies to short term and long term debt.

*Derecognition*

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statement of income.

Financial Instruments - initial recognition and subsequent measurement prior to January 1, 2018Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets*Initial Recognition and Measurement*

Financial assets are classified, at initial recognition as financial assets at FVTPL, loans and receivables, held-to-maturity (HTM) investments, AFS financial assets or derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial assets are recognized initially at fair value plus, in case of financial assets not recorded at FVTPL, transaction costs that are attributable to the acquisition of the financial assets.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date i.e., the date that the Group commits to purchase or sell the asset.

*Subsequent Measurement**Loans and Receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, loans and receivables are subsequently measured at amortized cost using the effective interest rate (EIR) method, less allowance for impairment losses. Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. Gains and losses are recognized in the consolidated statement of income when the loans are derecognized or impaired as well as through the amortization process.

Loans and receivables are included in current assets if maturity is within twelve (12) months from the end of the reporting period or within the Group's operating cycle, whichever is longer. Otherwise, these are classified as noncurrent assets.

As at December 31, 2017, the Group's loans and receivables consist of cash and cash equivalents and receivables (see Notes 4 and 5).

#### *AFS Financial Assets*

AFS financial assets are non-derivative financial assets that are designated as AFS or are not classified in any of the three other categories. The Group designates financial instruments as AFS financial assets if they are purchased and held indefinitely and may be sold in response to liquidity requirements or changes in market conditions. After initial recognition, AFS financial assets are measured at fair value with unrealized gains or losses being recognized directly in equity as “Net unrealized gains (losses) on decline in value of AFS financial assets”.

When the financial asset is disposed of, the cumulative gains or losses previously recorded in equity are recognized in the consolidated statement of income. Interest earned on the investments is reported as interest income using the EIR method. Dividends earned on investments are recognized in the consolidated statement of income as “Dividend income” when the right of payment has been established. The Group considers several factors in making a decision on the eventual disposal of the investment. The major factor of this decision is whether or not the Group will experience inevitable further losses on the investment. These financial assets are classified as noncurrent assets unless the intention is to dispose of such assets within twelve months from the end of the reporting period.

As at December 31, 2017, the Group classifies its investments in shares of stocks as AFS financial assets (see Note 9).

#### *Derecognition*

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to third party under a “pass-through” arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group’s continuing involvement. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to pay. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

#### *Impairment of Financial Assets*

The Group assesses, at each reporting date, whether there is objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that has occurred since the initial recognition of the asset (an incurred “loss event”) has an impact on the estimated future cash flows of the financial asset or the group of the financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization, and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

#### *Financial Assets at Amortized Cost*

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, the asset is included in the group of financial assets with similar credit risk and characteristics, and that group of financial assets is collectively assessed for impairment. Those similar credit risk characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtor’s ability to pay all amounts due according to the contractual terms of the assets being evaluated. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in the collective assessment of impairment.

If there is objective evidence that an impairment loss on financial assets carried at amortized cost has been incurred, the amount of loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset’s original EIR (i.e., the EIR computed at initial recognition). All impairment losses are recorded only through the use of an allowance account. The amount of loss is recognized in consolidated statement of income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in consolidated statement of income, to the extent that the carrying value of the asset does not exceed what its amortized cost could have been had there been no impairment at the reversal date.

In relation to loans and receivables, a provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Group will not be able to collect all the amounts due under the original terms of the invoice. Objective impairment evidence may constitute the increased probability of insolvency, or significant financial difficulties, of the debtor. The carrying amount of the receivable is reduced through the use of an allowance account. Impaired receivables are derecognized when they are assessed as uncollectible.

#### *AFS Financial Assets*

For AFS financial assets, the Group assesses at end of the reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. In case of equity investments classified as AFS financial assets, this would include a significant or prolonged decline in the fair value of the investments below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. When there is evidence of impairment, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in OCI, is removed from equity and recognized in consolidated statement of income.

Impairment losses on equity investments are not reversed through the consolidated statement of income while increases in fair value after impairment are recognized directly in equity through the consolidated statement of comprehensive income.

If there is objective evidence of impairment on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return of a similar financial asset.

The Group's financial assets are in the nature of AFS financial assets and loans and receivables. As at December 31, 2017, the Group has no financial assets at FVTPL, HTM investments and derivatives designated as hedging instruments in an effective hedge.

#### Financial Liabilities

##### *Initial Recognition and Measurement*

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, loans and borrowings, trade and other payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of interest-bearing loans and borrowings and trade and other payables, net of directly attributable transaction costs.

The Group's financial liabilities as at December 31, 2017 are in the nature of trade and other payables. The Group has no financial liabilities at FVTPL and derivatives designated as hedging instruments in an effective hedge.

##### *Subsequent Measurement*

##### *Trade and Other Payables*

This category pertains to financial liabilities that are not held for trading, not derivatives, or not designated at FVTPL upon the inception of the liability.

After initial recognition, these liabilities are subsequently measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any issue costs, and any discount or premium on settlement. Gains and losses are recognized in consolidated statement of income when the liabilities are derecognized as well as through the amortization process.

As at December 31, 2017, the Group classifies its accounts payable and accrued liabilities, and dividends payable as trade and other payables (see Note 11).

##### *Derecognition*

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

#### Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to set-off the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liabilities simultaneously. The Group assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Group and all of the counterparties.

#### Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 -Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 -Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3 -Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of the reporting period.

The fair value of financial instruments that are actively traded in organized financial markets is determined by reference to quoted market close prices at the close of business at the end of the reporting period.

For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques include comparison to similar investments for which market observable prices exist and discounted cash flow analysis or other valuation models.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### Interest in Jointly Controlled Operations

A joint operation is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the arrangement.

In relation to its interests in joint operations, the Group recognizes its:

- Assets, including its share of any assets held jointly
- Liabilities, including its share of any liabilities incurred jointly
- Revenue from the sale of its share of the output arising from the joint operation
- Expenses, including its share of any expenses incurred jointly

These are consolidated on a line by line basis.

#### Crude Oil Inventory

Crude oil inventory is carried at NRV at the time of production. NRV is the estimated selling price less cost to sell. The estimated selling price is the market value of crude oil inventory based on Platt's Dubai monthly average of the mid-day crude oil prices for the reporting month and is adjusted taking into account fluctuations of price directly relating to events occurring after the end of the reporting period to the extent that such events confirm conditions existing at the end of the reporting period. Estimated cost to sell is the cost incurred necessary to complete the sale (e.g., freight charges, transportation costs, etc.).

#### Property and Equipment

Property and equipment are stated at cost less accumulated depletion and depreciation, and any impairment in value. Such cost includes the cost of replacing part of such property and equipment when that cost is incurred and the recognition criteria are met.

The initial cost of property and equipment, other than wells, platforms, and other facilities, comprises its purchase price, including import duties, nonrefundable purchase taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditures incurred after the property and equipment have been put into operation, such as repairs and maintenance, are normally charged to income in the period the costs are incurred.

In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. Major maintenance and major overhaul costs that are capitalized as part of property and equipment are depreciated on a straight-line basis over the shorter of their estimated useful lives, typically the period until the next major maintenance or inspection, and the estimated useful lives of the related property and equipment.

Wells, platforms, and other facilities are depleted on a field basis under the unit-of-production (UOP) method based upon estimates of proved developed reserves except in the case of assets whose useful life is shorter than the lifetime of the field, in which case the straight-line method is applied. The depletion base includes the exploration and development cost of producing oil fields.

Depreciation of property and equipment, other than wells, platforms, and other facilities, is computed using the straight-line method over the estimated useful lives of the assets as follows:

Category	Number of Years
Office condominium units and improvements	20
Transportation equipment	5
Furniture and fixtures	5
Office equipment	3

Depletion and depreciation of an item of property and equipment begins when it becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Depletion and depreciation ceases when an item of property and equipment is fully depleted or depreciated or at the earlier of the date that the item is classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with PFRS 5, *Non-current Assets*

*Held for Sale and Discontinued Operations*, and the date the asset is derecognized.

When assets are retired or otherwise disposed of, the cost and related accumulated depletion, and depreciation, and any allowance for impairment are removed from the accounts and any gain or loss resulting from their disposals is recognized in consolidated statement of income.

The asset's reserves, useful lives and depletion and depreciation methods are reviewed periodically to ensure that the periods and methods of depletion and depreciation are consistent with the expected pattern of economic benefits from items of property and equipment.

Fully depreciated assets are retained in the account until they are no longer in use and no further depreciation is charged to current operations.

#### Decommissioning and Restoration Costs

Estimated decommissioning and restoration costs are based on current requirements, technology and price levels and are stated at net present value. The associated plug and abandonment costs are capitalized as part of the carrying amount of the related property and equipment account subject to the appropriate depreciation and amortization method. In respect of oil and natural gas production activities, the net present value calculation of the liability is based on the economic life of the

production assets and discounted using the risk-free rate for the Group that existed when the liability was initially measured. That amortization is recognized as an increase in the carrying amount of the liability and as an expense classified as accretion expense in the consolidated statement of income.

The obligation is reflected under decommissioning liability in the consolidated statements of financial position. The effects of changes resulting from revisions to the timing or the amount of the original estimate of the liability are incorporated on a prospective basis.

#### Investments in Associates

Associates are entities which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies. The investment in associates are accounted using equity method.

The Group's share of its associates' post-acquisition profits or losses is recognized in the consolidated statement of income and its share of post-acquisition movements in OCI is recognized in the consolidated statement of comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Distributions received from an investee reduce the carrying amount of the investment.

When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivable/s, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

#### Deferred Oil Exploration Costs

Exploration and evaluation activity involves the search for hydrocarbon resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource. Once the legal right to explore has been acquired, costs directly associated with exploration are capitalized under "Deferred oil exploration costs" account. The Group's deferred oil exploration costs are specifically identified of each Service Contract (SC) area. All oil exploration costs relating to each SC are deferred pending the determination of whether the contract area contains oil reserves in commercial quantities. Capitalized expenditures include costs of license acquisition, technical services and studies, exploration drilling and testing, and appropriate technical and administrative expenses. General overhead or costs incurred prior to having obtained the legal rights to explore an area are recognized as expense in the consolidated statement of income when incurred.

If no potentially commercial hydrocarbons are discovered, the deferred oil exploration asset is written off through the consolidated statement of income. If extractable hydrocarbons are found and, subject to further appraisal activity (e.g., the drilling of additional wells), it is probable that they can be commercially developed, the costs continue to be carried under deferred oil exploration costs account while sufficient/continued progress is made in assessing the commerciality of the hydrocarbons. Costs directly associated with appraisal activity undertaken to determine the size, characteristics and commercial potential of a reservoir following the initial discovery of hydrocarbons, including the costs of appraisal wells where hydrocarbons were not found, are initially capitalized as deferred oil exploration costs.

At the completion of the exploration phase, if technical feasibility is demonstrated and commercial reserves are discovered, then, following the decision to continue into the development phase, the oil exploration costs relating to the SC, where oil in commercial quantities are discovered, is first assessed for impairment and (if required) any impairment loss is recognized, then the remaining balance is transferred to "Wells, platforms, and other facilities" account shown under the "Property and equipment" account in the consolidated statement of financial position.

Deferred oil exploration costs are assessed at each reporting period for possible indications of impairment. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case or is considered as areas permanently abandoned, the costs are written off through the consolidated statement of income. Exploration areas are considered permanently abandoned if the related permits of the exploration have expired and/or there are no definite plans for further exploration and/or development.

The recoverability of deferred oil exploration costs is dependent upon the discovery of economically recoverable reserves, the ability of the Group to obtain necessary financing to complete the development of reserves and future profitable production or proceeds from the disposition of recoverable reserves.

#### Farm-ins and Farm-outs

The Group does not record any expenditure made by the farminee on its account. It also does not recognize any gain or loss on its exploration and evaluation farm-out arrangements, but redesignates any cost previously capitalized in relation to

the whole interest. Any cash consideration received directly from the farminee is credited against costs previously capitalized in relation to the whole interest with any excess accounted for by the farmor as a gain on disposal.

#### Impairment of Nonfinancial Assets

##### *Investments in Associates*

The Group determines at each end of the reporting period whether there is any objective evidence that the investment in associates is impaired. If this is the case, the Group calculates the amount of impairment being the difference between the recoverable amount of the associate and the carrying value and recognizes the amount as part of "Others - net" in the consolidated statement of income.

An assessment is made at the end of the reporting period as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indications exist, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the investment's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the investments is increased to its recoverable amount. The increased amount cannot exceed the carrying amount that would have been determined had no impairment loss been recognized for the assets in prior years. Such reversal is recognized in the consolidated statement of income.

##### *Deferred Oil Exploration Costs*

An impairment review is performed, either individually or at the cash generating unit (CGU) level, when there are indicators that the carrying amount of the deferred oil exploration costs may exceed their recoverable amounts. To the extent that this occurs, the excess is fully provided against in the reporting period in which this is determined. Deferred oil exploration costs are reassessed on a regular basis and these costs are carried forward provided that at least one of the following conditions is met:

- the period for which the entity has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;
- such costs are expected to be recouped in full through successful development and exploration of the area of interest or alternatively, by its sale; or
- exploration and evaluation activities in the area of interest have not yet reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in relation to the area are continuing, or planned for the future.

##### *Property and Equipment, Nonfinancial Prepayments and Other Current and Noncurrent Assets*

The Group assesses, at each reporting period, whether there is an indication that an asset may be impaired. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any such indication exists and where the carrying amount of an asset exceeds its recoverable amount, the asset or CGU is written down to its recoverable amount. The estimated recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The fair value less costs to sell is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date less the costs of disposal, while value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the CGU to which the asset belongs. Impairment losses are recognized as part of "Other income - net" in the consolidated statement of income.

Recovery of impairment loss recognized in prior years is recorded when there is an indication that the impairment loss recognized for the asset no longer exists or has decreased. The recovery is recorded in the consolidated statement of income. However, the increased carrying amount of an asset due to a recovery of an impairment loss is recognized to the extent it does not exceed the carrying amount that would have been determined (net of depreciation, depletion and amortization) had no impairment loss been recognized for that asset in prior years.

#### Capital Stock

Capital stock is measured at par value for all shares issued. When the Group issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as a deduction from proceeds, net of tax.

Own equity instruments which are reacquired (treasury shares) are recognized at cost and deducted from equity. No gain or loss is recognized in consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments. Any difference between the carrying amount and the consideration received is recognized in paid-in capital from sale of treasury shares.

#### Retained Earnings

Retained earnings represent the cumulative balance of net income or loss, dividend distributions, prior period adjustments, effects of changes in accounting policy and other capital adjustments.

Earnings per Share (EPS)

Basic EPS is computed by dividing net income attributable to ordinary equity holders to the Parent Company by the weighted average number of common shares outstanding, after giving retroactive effect for any stock dividends, stock splits or reverse stock splits during the year.

Diluted EPS is computed by dividing net income ordinary equity holders to the Parent Company by the weighted average number of common shares outstanding during the year, after giving retroactive effect for any stock dividends, stock splits or reverse stock splits during the year, and adjusted for the effect of dilutive options.

Outstanding stock options will have a dilutive effect under the treasury stock method only when the average market price of the underlying common share during the period exceeds the exercise price of the option. Where the effect of the exercise of all outstanding options has anti-dilutive effect, basic and diluted EPS are stated at the same amount.

Dividends on Capital Stock

Dividends on common shares are recognized as a liability and deducted from equity when approved by the Parent Company's BOD. Dividends for the year that are approved after the end of the reporting period are dealt with as an event after the reporting period.

Revenue Recognition - Accounting policies after January 1, 2018

Revenue is recognized when control of the petroleum products are transferred to the customer at an amount that reflects the consideration which the Group expects to be entitled in exchange for those goods. The Group has generally concluded that it is the principal in its revenue arrangements.

*Petroleum Revenue*

Sale of petroleum products is recognized at a point in time when the control of the goods has transferred from the Consortium Operator of the joint arrangement to the customer, which is typically upon delivery of the petroleum products to the customers. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates, and other sales tax or duty.

The revenue recognized from the sale of petroleum products pertains to the Group's share in revenue from the joint operations. The revenue sharing is accounted for in accordance with PFRS 11, *Joint Arrangements*.

*Interest Income*

Interest income is recognized as the interest accrues taking into account the effective yield on the asset.

*Dividend Income*

Dividend income is recognized when the right to receive the payment is established.

Revenue Recognition - Accounting policies before January 1, 2018

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts and other sales taxes or duty. The following specific recognition criteria must also be met before revenue is recognized:

*Petroleum Revenue*

Revenue is derived from sale of petroleum to third party customers. Sale of petroleum is recognized upon production based on the Group's participating interest. Revenue is measured at the fair value of consideration receivable, excluding discounts, and other sales tax or duty based on the Group's participating interest.

*Interest Income*

Interest income is recognized as the interest accrues taking into account the effective yield on the asset.

*Dividend Income*

Dividend income is recognized when the right to receive the payment is established.

Costs and Expenses

Costs and expenses are recognized in the consolidated statement of income when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably. Costs and expenses are recognized in the consolidated statement of income in the year in which they are incurred.

*Share in Costs and Operating Expenses*

Share in costs and operating expenses include production costs of SC-14 and transportation costs per lifting and ending inventory which is recognized upon the allocation of the amounts mentioned by the SC. Allocation is done by the use of the Group's participating interest in the SC.

#### *General and Administrative Expenses*

Expenses incurred in the direction and general administration of day-to-day operation of the Group are generally recognized when the services are used or the expenses arise.

#### OCI

OCI comprises items of income and expenses (including items previously presented under the consolidated statement of changes in equity) that are not recognized in the consolidated statement of income for the year in accordance with PFRS.

#### Share-Based Payment Transactions

Certain employees (including directors) of the Parent Company receive remuneration in the form of share appreciation right (SAR). This entitles the employees to receive cash which is equal to the excess of the market value of the Group's shares over the award price as of a given date.

In valuing cash-settled transactions, the entity measures the goods or services acquired and the liability incurred at the fair value of the liability. Until the liability is settled, the entity remeasures the fair value of the liability at each end of the reporting period and at the date of settlement, with any changes in fair value recognized in consolidated statement of income for the period. The fair value is determined using an appropriate pricing model, further details of which are given in Note 11.

#### Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a result of a past event; (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. If the effect of time value of money is material, provisions are determined by discounting the expected future cash flows at a pretax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to passage of time is recognized as an interest expense.

#### *Provision for Plug and abandonment costs*

The Group records the present value of estimated costs of legal and constructive obligations required to restore oil fields in the period in which the obligation is incurred. The nature of these restoration activities includes dismantling and removing structures, rehabilitating wells and platforms, and dismantling operating facilities. The obligation generally arises when the asset is installed or the environment is disturbed at the production location. When the liability is initially recognized, the present value of the estimated cost is capitalized by increasing the carrying amount of the related oil assets. Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and the risks specific to the liability. The periodic unwinding of the discount is recognized in the consolidated statement of income under "Accretion expense". Additional disturbances or changes in plug and abandonment costs will be recognized as additions or charges to the corresponding assets and provision for decommissioning when they occur.

Where decommissioning is conducted systematically over the life of the operation, rather than at the time of closure, provision is made for the estimated outstanding continuous decommissioning work at each end of the reporting period and the cost is charged to the consolidated statement of income. For closed oil fields, changes to estimated costs are recognized immediately in the consolidated statement of income.

The ultimate cost of decommissioning is uncertain and cost estimates can vary in response to many factors including changes to the relevant legal requirements, the emergence of new restoration techniques or experience. The expected timing of expenditure can also change, for example in response to changes in oil reserves or production rates. As a result, there could be significant adjustments to the provision for decommissioning, which would affect future financial results.

Decommissioning fund committed for use in satisfying environmental obligations are included under "Other noncurrent assets" in the consolidated statement of financial position.

#### Retirement Benefit Liability

The Group has a funded, non-contributory defined benefits retirement plan. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method. This method reflects service rendered by employees to the date of valuation and incorporates assumptions concerning the employees' projected salaries.

Defined benefit costs comprise the following:

- Service cost

- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as "Retirement benefit expense" under personnel costs in the consolidated statement of income. Past service costs are recognized when plan amendment or curtailment occurs.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as "Interest income" in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to the consolidated statement of income in subsequent periods. Remeasurements are recognized in "Retained earnings" after the initial adoption of the Revised PAS 19.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

The standard requires an entity to recognize short-term employee benefits when an employee has rendered service in exchange of those benefits.

#### Income Taxes

##### *Current Income Tax*

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the tax authority. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the end of the reporting period.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

##### *Deferred Income Tax*

Deferred income tax is provided using the balance sheet liability method on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable income or loss; and
- in respect of taxable temporary difference associated with investments in foreign subsidiaries and interest in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in a foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused tax losses, to the extent that it is probable that taxable income will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilized except:

- where the deferred income tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable income or loss; and
- in respect of deductible temporary differences associated with investment in foreign subsidiaries and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences

will reverse in the foreseeable future and taxable income will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each end of the reporting period and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each end of the reporting period and are recognized to the extent that it has become probable that sufficient future taxable profits will allow the deferred tax assets to be recovered.

In respect of deductible temporary differences associated with investment in associates, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the end of the reporting period.

Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

#### Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

#### Foreign Currency Transactions

Transactions denominated in foreign currencies are recorded using the applicable exchange rate at the date of the transaction. Outstanding monetary assets and liabilities denominated in foreign currencies are translated using the applicable closing functional currency exchange rate at the end of the reporting period. Foreign exchange gains or losses arising from foreign currency-denominated transactions and translations are recognized in the consolidated statement of income.

Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transaction. Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on transaction of nonmonetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in the fair value of the item.

#### Segment Reporting

Currently, the Group has only one business segment. The Parent Company is primarily involved in oil exploration and production while PPC is primarily engaged in production, supply, trading and generation of electric power using various energy sources. Revenue generated consists mainly of revenue from petroleum operations. Other income is derived from equity in net earnings of associates. PPC has not yet started commercial operation since its incorporation therefore, expenses were only incurred during the year.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the President and Chairman of the Parent Company who makes strategic decisions.

#### Events After the End of the Reporting Period

Events after the end of the reporting period that provide additional information about the Group's position at the end of the reporting period (adjusting events) are reflected in the consolidated financial statements. Events after the end of the reporting period are not adjusting events are disclosed in the notes to consolidated financial statements when material to the consolidated financial statements.
