PART II – OTHER INFORMATION	18
SIGNATURES	18
INDEX TO FINANCIAL STATEMENTS AND SUPPLEMENTARY SCHEDULES	19

PART 1 – FINANCIAL INFORMATION

Item 1. Financial Statements

1. The unaudited Consolidated Financial Statements of the Company for the 3rd quarter ended 30 September 2026 are included in this report. The schedules listed in the accompanying Index to Supplementary Schedules are filed as part of the SEC Form 17Q.

2. Interim Statements of Operations for the current interim period (01 January to 30 September 2026), with comparative Statement of Operations for the comparable period (01 January to 30 September 2025) attached to this report.

3. A statement showing changes in equity cumulatively for the current financial year to date (01 January to 30 September 2026), with a comparative statement for the comparable year-to-date period of the immediately preceding financial year (01 January to 30 September 2025) is attached to this report.

4. The basic and diluted earnings/loss per share are presented on the face of the attached Statement of Operations (01 January to 30 September 2026), as well as the basis of computation thereof.

5. The Company's interim financial report for the 3rd quarter 2026 is in compliance with Generally Accepted Accounting Principles ("GAAP"). Included in this report is a summary of the Company's significant accounting policies.

6. The Company follows the same accounting policies and methods of computation in its interim financial statements (01 January to 30 September 2026) as compared with the most recent annual financial statements (2025), and no policies or methods have been changed. There were NO reclassifications of financial assets made into and from each category as of the current reporting period.

7. There were NO seasonal or cyclical aspects that had a material effect on the financial condition or results of interim operations of the Company.

8. There were NO unusual items during the interim period (01 January to 30 September 2026), the nature, amount, size or incidents of which have affected the assets, liabilities, equity, net income or cash flows of the Company.

9. There were NO changes in the estimates of amounts reported in prior financial year (2025), which had a material effect in the current interim period (01 January to 30 September 2026).

10. There were NO issuances, repurchases and repayments of debt and equity securities during the current interim period (January 1 to September 30, 2026).

11. For the period January 1 to September 30, 2026, NO cash dividends were declared by the Board of Directors.

12. The Company does not generate revenues from a particular segment, and its business is not delineated into segments, whether by business or geography. The Company is not required to disclose segment information in its financial statements.

13. Up to the time of filing of this quarterly report, there were NO material events after the end of the interim period (January 1 to September 30, 2026) that have not been reflected in the financial statements for said interim period.

14. There were NO changes in the composition of the Company during the interim period (January 1 to September 30, 2026) and there were NO business combinations, acquisition or disposal of subsidiaries and long-term investments, restructuring and discontinuance of operations during said interim period.

15. The Company has NO contingent liabilities or contingent assets as of its last annual balance sheet date (December 31, 2025) and as of end of current interim period (September 30, 2026).

16. There are NO material contingencies and any other events or transactions that are material to an understanding of the current interim period (January 1 to September 30, 2026).

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Financial Performance

Total revenues and other income for the first three quarters ended September 30, 2026, increased by ₱110.3 million or 93% to ₱229.0 million from ₱118.7 million for the same period last year. Petroleum revenues increased by ₱61.0 million or 52% to ₱177.9 million from ₱116.9 million for the same period last year. Production volume declined by 9.1%, however this was offset by the higher participating interest in the Galoc block from 10.182% in 2025 to 15% in 2026 and higher average crude oil price. The total gross production decreased to 275,742 barrels for the first three quarters ended September 30, 2026, from 303,420 barrels produced for the same period last year. The peso-dollar foreign exchange rates amounted to ₱62.64 and ₱58.20 as of September 30, 2026, and September 30, 2025, respectively. Equity in net earnings of associates improved by ₱47.9 million due to the effect in investments in associates' turnaround in equity take up from net loss in 2025 to net income in 2026. Interest income increased by ₱1.4 million due to higher placements.

Total costs and expenses decreased by ₱2.8 million from ₱157.4 million for the first three quarters of 2025 to ₱160.2 million for the first three quarters of 2026.

Foreign exchange gain amounted to ₱10.8 million for the first three quarters of 2026 from ₱1.1 million for the same period last year. Provision for income tax amounted to ₱50.8 million for the first three quarters of 2026 as compared to ₱30.5 million for the same period last year.

The amount of provision for income taxes in 2026 primarily pertains to the utilization of NOLCO against taxable income for the first three quarters of 2026 and amortization of deferred tax assets from the expiring NOLCO. The Company's net income after tax amounted to ₱28.8 million for the first three quarters of 2026 as compared to a net loss of ₱68.1 million for the same period last year.

The Company's top five (5) key performance indicators are as follows:

	September 30, 2026	December 31, 2025
Current Ratio	*8.42 : 1*	*10.54 : 1*
Current Assets	807,348,567	740,665,905
Current Liabilities	95,878,121	70,300,404
Debt to Equity Ratio	*0.10 : 1*	*0.09 : 1*
Total Liabilities	279,846,686	252,064,250
Stockholders Equity	2,758,650,937	2,703,634,913
Book Value per Share	*0.0144*	*0.0141*
Stockholders Equity	2,758,650,937	2,703,634,913
Shares outstanding	191,868,805,358	191,868,805,358
Earnings (Loss) per Share	*0.00015*	*(0.000297)*
Net Income (Loss)*	28,810,334	(56,892,555)
Weighted ave. no. of shares	191,868,805,358	191,868,805,358

**For the period January 1 to September 30*

The current ratios as of September 30, 2026, and December 31, 2025, are 8.42:1 and 10.54:1, respectively. The Company's current assets exceeded its current liabilities by ₱711.5 million and ₱670.4 million as of September 30, 2026, and December 31, 2025, respectively. The "Financial assets at fair value through other comprehensive income (FVOCI)" account in the balance sheet consists of shares of stock which are listed with the Philippine Stock Exchange, and which could be sold to meet the Company's obligations as might be called for by future circumstances. These shares of stock had an aggregate market value of ₱96.9 million as of September 30, 2026, and ₱70.7 million as of December 31, 2025. If these shares would be considered part of Current Assets, the recomputed current ratio would be 9.43:1 as of September 30, 2026, and 11.54:1 as of December 31, 2025.

Total assets increased from ₱2.955 billion as of December 31, 2025, to ₱3.038 billion as of September 30, 2026. Cash and cash equivalents reflected a net decrease of ₱57.4 million or 22% due to payment of expenses and share in projects' costs during the period, as well uncollected proceeds from lifting no. 84 of SC88 Galoc that was completed last September 24, 2026. Receivables increased by ₱153.1 million mainly due to trade receivables, representing the company's share in the aforementioned lifting no.84 of SC88 Galoc. Crude oil inventory decreased by ₱29.7 million or 83% mainly due to the timing of lifting no. 84 of SC88 Galoc, which was completed about a week prior to the end of third quarter. Other current assets increased by ₱0.7 million due to additional prepaid expenses booked net of amortizations as of September 30, 2026. Property and equipment reflected a net decrease of ₱1.2 million to ₱239.0 million as of September 30, 2026. Financial assets at FVOCI increased by ₱26.2 million due to the adjustment in the market valuation of the company's listed stock investments. Deferred oil exploration costs increased by ₱13.7 million due to additional project costs on petroleum service contracts. Deferred tax assets reflected a net decrease of ₱47.8 million primarily due to

the amortization of deferred tax assets from the NOLCO that is expected to expire in 2026 and application of NOLCO against taxable income for the first three quarters of 2026.

Total liabilities increased by ₱27.8 million from ₱252.1 million as of December 31, 2025, to ₱279.8 million as of September 30, 2026 mainly due to accrued operating expenses pertaining to SC88 Galoc.

Stockholders' equity increased by ₱55.0 million from ₱2.703 billion as of December 31, 2025 to ₱2.759 billion as of September 30, 2026. The increase was due to the adjustment for the decline in value of financial assets at FVOCI of ₱26.2 million in the market valuation of the company's listed stock investments, and ₱28.8 million net income recorded for the first three quarters of 2026. As of September 30, 2026, net unrealized loss on the decline in value of financial assets at FVOCI amounted to ₱13.7 million as compared to ₱39.9 million as of December 31, 2025. The company's retained earnings increased by ₱28.8 million to ₱1.019 billion as of September 30, 2026 from ₱990.4 million as of December 31, 2025.

The Company has a majority-owned subsidiary, Philodrill Power Corporation (PPC) (formerly Phoenix Gas & Oil Exploration Co., Inc.). The Company acquired 100% of its capital stock in May 2007. Since PPC has NOT yet started commercial operations, disclosures on performance indicators are as follows:

	September 30, 2026	December 31, 2025
Current Ratio	*175 :1*	*175 :1*
Current Assets	8,228,826	8,228,826
Current Liabilities	47,040	47,040
Debt to Equity Ratio	*0.006 :1*	*0.006 :1*
Total Liabilities	47,040	47,040
Stockholders' Equity	8,181,786	8,181,786
Book Value per Share	*0.0006543*	*0.0006543*
Stockholders Equity	8,181,786	8,181,786
Average shares outstanding	12,505,000,000	12,505,000,000
Income (loss) per Share	-	-
Net Income (Loss)	No operation	No operation
Average shares outstanding	12,505,000,000	12,505,000,000

Discussion and Analysis of Material Events and Uncertainties

In general, Management is not aware of any material event or uncertainty that has affected the current interim period and/or would have a material impact on future operations of the Company. The Company will continue to be affected by the Philippine business environment as may be influenced by any local/regional financial and political crises.

1. There are NO known trends, demands, commitments, events or uncertainties that have or are reasonably likely to have material impact on the Company's liquidity. Should the Company's cash position be not sufficient to meet current requirements, the Company may consider:

a) collecting a portion of Accounts Receivables;
b) selling a portion of its existing investments and assets;
c) generating cash from loans and advances; and
d) issuing subscriptions call on the balance of the subscription receivable.

2. There are NO events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation.

3. There are NO material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

4. The Company has NO material commitments for capital expenditure, except for the Company's share in the exploration and development expenditures in the SCs. The Company expects to be able to fund such expenditures from: operations, collection of subscriptions and other receivables, and from loans/financing, or to avoid incurring these expenditures altogether by way of farm-outs.

5. There are NO-known trends, events or uncertainties that have had or are reasonably expected to have a material impact on the revenues or income of the Company from continuing operations.

6. There are NO significant elements of income or loss that did not arise from the Company's continuing operations.

7. There have been NO material changes from period to period in one or more-line items of the Company's financial statements, except those discussed below:

   Cash and cash equivalents reflected a net decrease of ₱57.4 million or 22% due to due to payment of expenses and the company's share in the project costs of SC53, SC80, SC81 and SC86 during the period, as well uncollected proceeds from lifting no. 84 of SC88 Galoc that was completed last September 24, 2026.

   Receivables increased by ₱153.1 million mainly due to trade receivables, representing the company's share in SC 88 Galoc lifting.

   Crude oil inventory decreased by ₱29.7 million or 83% mainly due to the timing of lifting no. 84 of SC88 Galoc, which was completed about a week prior to the end of third quarter.

   Other current assets increased by ₱0.7 million due to the additional prepaid expenses booked net of amortizations during the interim period.

   Deferred tax assets reflected a net decrease of ₱47.8 million primarily due to the amortization of deferred tax assets from the NOLCO that is expected to expire in

2026 and application of NOLCO against taxable income for the first three quarters of 2026.

Accounts payable and accrued liabilities reflected a ₱25.6 million increase due to the accrued operating expenses for SC88 Galoc during the interim period.

Retirement benefit liability increased by ₱2.2 million or 33% due to the pension expense booked during the interim period.

Net unrealized loss on the decline in value of financial assets at FVOCI as of December 31, 2025 amounted to ₱39.9 million. For the interim period, ₱26.2 million adjustment/recovery in the market valuation pertaining to the listed stock investments of the Company was booked. As of September 30, 2026, net unrealized loss on the decline in market value of financial assets at FVOCI amounted to ₱13.7 million.

The company's retained earnings increased by ₱28.8 million to ₱1.019 billion as of September 30, 2026. The increase was due to the net income booked for the first three quarters of 2026.

Petroleum revenues increased by ₱61.0 million or 52% to ₱177.9 million from ₱116.9 million for the same period last year. Production volume declined by 9.1% however, this was offset by the higher participating interest in the Galoc block from 10.182% in 2025 to 15% in 2026 and higher average crude oil price of $73.16 for the period ending September 30, 2026, as compared to $70.54 for the same period last year. The total gross production decreased to 275,742 barrels for the first three quarters ended September 30, 2026, from 303,420 barrels produced for the same period last year.

Equity in net earnings of associates improved by ₱47.9 million due to the effect in investments in associates' turnaround in equity take up from net loss in 2025 to net income in 2026.

Interest income increased by ₱1.4 million from ₱25.0 million to ₱26.4 million for the first three quarters ended September 30, 2026 due to higher interest rates.

Foreign exchange gain amounted to ₱10.8 million for the first three quarters of 2026 from ₱1.1 million for the same period last year.

Net income amounted to ₱28.8 million for the first three quarters of 2026, as compared to net loss of ₱68.1 million for the same period last year.

8. There are NO seasonal aspects that have material effect on the financial condition or results of operations.

Item 3. Management's Assessment and Evaluation of Financial Risk Exposures

A. Financial Instruments
Since there were NO financial assets reclassified into and from each category, disclosures on the following are:

a. The financial assets reclassified into and from each category; – Not Applicable

b. For each reporting period until derecognition, the carrying amounts and fair values of all financial assets are reclassified in the current reporting period and previous reporting periods; – Not Applicable

c. For financial assets reclassified in rare circumstances, the facts that would establish such kind of circumstances; – Not Applicable

d. In the reporting period to which financial assets are reclassified, the fair value of the gains or losses of those assets is recognized either in profit or loss, or in equity (other comprehensive income) in that reporting period and previous reporting periods; – Not Applicable

e. For the remainder of the instruments' lives, the gains or losses that would have been recognized in profit or loss, or equity had not been reclassified, together with the gains, losses, income and expenses now recognized; – Not Applicable

f. As at date of reclassification, the effective interest rates and estimated cash flows that the company expects to recover. – Not Applicable

Fair Values of Financial Instruments

The following table shows the carrying amounts and fair values of the Group's financial assets and financial liabilities:

	Consolidated Unaudited September 2026	Consolidated Unaudited September 2026	Consolidated Unaudited September 2025	Consolidated Unaudited September 2025

Quoted AFS investments are carried at fair value based on the quoted values of the securities.

B. Financial Risk Management Objectives and Policies

Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise mainly of cash and cash equivalents, receivables (except accounts with contract operators and advances to officers and employees), financial assets at FVOCI, other noncurrent assets, accounts payable and accrued liabilities (except withholding taxes) and dividends payable. The main purpose of these financial instruments is to provide financing for the Group's operations and capital-intensive projects.

The Board of Directors (BOD) is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

The main risks arising from the Group's financial instruments are credit risks, liquidity risk, and market risks. The market risks exposure of the Group can be further classified to foreign currency risk and equity price risk. The BOD reviews and approves the policies for managing some of these risks and they are summarized as follows:

Credit risks

Credit risk is the risk that the Group will incur a loss because its customers or counterparties failed to discharge their contractual obligations. With respect to credit risk arising from the other financial assets of the Group, which comprise of cash in banks, short-term investments, receivables and financial assets at FVOCI, advances to related parties, the Group's exposure to credit risk could arise from default of the counterparty.

The Group trades only with recognized, creditworthy third parties. However, the Group's credit risk exposure is concentrated on a few counterparties as inherent in the oil exploration and production business.

As of September 30, 2026, all the outstanding trade receivables are from the SC88 consortium. The operator negotiated for the sale of future Galoc cargoes to exclusive buyer Trafigura Pte Ltd.

The table below summarizes the Group's gross maximum credit risk exposure from its financial instruments. These amounts are gross of collateral and credit enhancements, but net of any amounts offset and allowance for impairment losses:

	Unaudited balances as of September 30, 2026
Cash and cash equivalents	203,673,552
Loans and receivables	
Advances to related companies	411,640,000
Accounts with contract operators and partners	148,805,975
Accrued interest	27,255,834
Long-term bank placements	20,000,000
Financial assets at FVOCI	96,953,966
Gross maximum credit risk exposure	**908,329,327**

The table below shows the credit quality of the Group's financial assets by class as of September 30, 2026, based on the Group's credit evaluation process:

			Past due but not impaired				
	Neither past due nor impaired High Grade	Neither past due nor impaired Standard Grade	1-30 days	31-90 days	Over 90 days	Impaired Financial Assets	Total
Cash and cash equivalents	203,673,552	–	–	–	–	–	203,673,552
Loans and receivables							
Advances to related companies	411,640,000	–	–	–	–	–	411,640,000
Accounts with partners	148,805,975	–	–	–	–	–	148,805,975
Accrued interest	–	–	1,985,552	4,668,304	20,601,978	–	27,255,834
Long-term bank placements	20,000,000	–	–	–	–	–	20,000,000
Financial assets at FVOCI	96,953,966	–	–	–	–	–	96,953,966
Total	**881,073,493**	–	**1,985,552**	**4,668,304**	**20,601,978**	–	**908,329,327**

Credit quality of cash and cash equivalents, receivables and AFS financial assets are based on the nature of the counterparty.

"High grade" credit quality financial assets pertain to financial assets with insignificant risk of default based on historical experience and/or counterparty credit standing. "Standard grade" credit quality financial assets are not yet past due yet are from counterparties with a history of default. However, the Group cannot declare any of these amounts as uncollectible because they arise from related companies for which there is a common control.

"Past due but not impaired" are items which are already past their maturity dates, but the amount due is still judged as collectible by the Group based on its assessment of the age and creditworthiness of the counterparties. Lastly, "Impaired financial assets" are those that are long-outstanding and has been provided with allowance for impairment losses.

Liquidity risk

Liquidity risk is the risk where the Group becomes unable to meet its payment obligations when they fall due under normal and stress circumstances. The Group's objective is to maintain a

balance between continuity of funding and flexibility using bank loans and operating cash flows. The Group addresses liquidity concerns primarily through cash flows from operations and short-term borrowings.

The table below summarizes the aging analysis of the Group's financial assets as of September 30, 2026, that is used to manage the liquidity risk of the Company:

	Less than three months	Three to twelve months	Total
Cash and cash equivalents	203,673,552	–	203,673,552
Receivables:			
Advances to related parties	–	411,640,000	411,640,000
Accounts with partners	148,805,975	–	148,805,975
Accrued interest	6,653,856	20,601,978	27,255,834
Long-term bank placements	–	20,000,000	20,000,000
Financial assets at FVOCI	96,953,966	–	96,953,966
	456,087,349	452,241,978	908,329,327

The table below summarizes the maturity profile of the Group's accounts payable, accrued liabilities and dividends payable based on contractual undiscounted payments.

	Less than three months	Three to twelve months	Total
September 30, 2026	104,163,348	–	104,163,348

Market Risk

Market risk is the risk of loss to future earnings, to fair values or to future cash flows that may result from changes in the price of a financial instrument. The value of a financial instrument may change because of changes in foreign currency exchange rates and equity prices.

*Foreign currency r*isk

Foreign currency risk is the risk that the value of the Group's financial instruments diminishes due to unfavorable changes in foreign exchange rates. The Group's transactional currency exposures arise from cash and cash equivalents and receivables. The Parent Company's entire share in petroleum operations revenue is denominated in United States Dollar (USD). Consequently, the Group is exposed to foreign exchange risk arising from its USD-denominated receivables and cash and cash equivalents.

As of September 30, 2026, the exchange rate of the Philippine peso to the US$ is ₱62.64 to US$1.00.

Equity price risk

Equity price risk is the risk that the fair values of investments in quoted equity securities could decrease because of changes in the prices of equity indices and the value of individual stocks. The Group is exposed to equity securities price risk because of investments held by the Parent Company, which are classified in the consolidated statements of financial position as financial assets at FVOCI.

PETROLEUM PROJECTS

SERVICE CONTRACT NO. 88 (Galoc)

- **Oil Production:** The field's average daily production for the last five days of September 2026 was 955 barrels of oil. As of September 30, 2026, the overall production from the Galoc Field was 25,606,691 barrels of oil, while the calculated commercial oil in storage was 7,178 barrels. The offtake of Cargo Palawan No. 84 was conducted on September 23-24, 2026. A net volume of 207,805 barrels was lifted using OT Marlin Azurite.

- **Operations Update:**
  - **INAEC Air Transportation Contract:** NPG informed the Joint Venture (JV) partners that INAEC has requested a 33% to 50% increase (depending on the oil price) in its helicopter service rates under the existing contract, which remains valid until October 2027. NPG and INAEC agreed to a 20% increase in service costs.

  - **Environmental Compliance Certificate Amendment:** The Department of Natural Resources – Environmental Management Bureau (DENR-EMB) has approved the amendment of the Environmental Compliance Certificate (ECC-C0-0605-004-222), originally issued under Service Contract 14C1, for the Galoc Field Area and Development (GFAD). The approved amendment formally recognizes SC 88 as the governing legal document for the continued petroleum production operations at the Galoc Field.

- **Decommissioning Update:** The revised 2026 Decommissioning Plan has been submitted for JV/DOE approval, with an updated US$13.28 million gross Best Estimate, supported by sufficient escrow funding, and key milestones targeting Cessation of Production (CoP) on April 13, 2027, final offtake on April 29, 2027, Floating Production, Storage, and Offloading (FPSO) tow completion by June 5, 2027, with the final activity, Campaign D, deferred to the subsequent calm-weather window in 2028.

SERVICE CONTRACT NO. 53 (Onshore Mindoro)

- **Deed of Assignment (DOA) with Gas2Grid (G2G):** The DOE advised Philodrill that the review of the technical and financial documents was completed. The legal documents have been forwarded to the DOE's Legal Department for evaluation.

- **Information, Education and Communication:** Following Philodrill's presentation to the Provincial Council, a motion was made to refer the request for a Letter/Resolution of No Objection to the Committees on Environment and Energy/Power for deliberation.

  At the municipal level, Philodrill, together with representatives from the DOE, presented the Progreso-2 drilling project during a separate session of the Sangguniang Bayan of San Jose, Occidental Mindoro. The session was attended by the Barangay

Captain and Sangguniang Barangay officials of Barangay San Isidro, as well as representatives of other government agencies. Philodrill and DOE representatives addressed the questions and concerns raised by the officials.

Vice-Mayor Javier, who presided over the session, subsequently announced that the request for a Letter/Resolution of No Objection would be referred to the Committees on Energy, Environment, Land Use and Local Government for further deliberation. The Sangguniang Bayan requested that a public hearing be conducted, while the Barangay expressed a preference for an on-site presentation to inform local stakeholders.

A joint team comprising representatives from Philodrill, the DOE, and G2G completed the IEC campaign. The Barangay Chairman assured the team that the Letter/Certificate of No Objection (LONO) would be issued in due course and subsequently forwarded to the Sangguniang Bayan and Panlalawigan for their reference.

DP PSC NO. 3 (WEST LINAPACAN)

- **DPPSC Application:** On July 24, 2026, the JV partners, together with Tetragon, met with DOE Undersecretary Sales to discuss the proposed Work Program for the DPPSC application. During the meeting, however, the Undersecretary advised that the DPPSC application should be submitted solely by the original JV participants of SC 14C-2. According to the DOE, Tetragon's participation at the application stage could give rise to legal issues. Instead, the Undersecretary recommended that the original JV members proceed with the DPPSC application and allow Tetragon to participate only after a new contract has been awarded. This guidance differed from the parties' earlier understanding based on previous discussions with the DOE regarding Tetragon's participation in the application process.

    - **Tetragon's Participation:** In light of the DOE's guidance that Tetragon could not participate in the DPPSC application process, Tetragon has decided to withdraw from participation in the West Linapacan Block.

    - **Revised Application Documents:** A new Joint Application and Participation Agreement (JAPA), without Tetragon, was executed by the partners. The technical justification and the proposed work program and budget for the DP PSC were likewise approved by the parties.

SERVICE CONTRACT 80 & 81 (Sulu Sea)

- **Tetragon ASX Listing:** Tetragon (TET) was officially listed on the Australian Securities Exchange (ASX) and commenced trading on July 9, 2026. The Perth-based oil and gas company raised A$4 million through its initial public offering (IPO), issuing 20 million shares at A$0.20 per share. The shares are currently being traded at A$0.23 per share.

- **Joint Operating Agreements (JOAs):** Tetragon and the JV partners executed the Joint Operating Agreements (JOAs) for SC 80 and SC 81, establishing a clear joint

governance framework for the joint operations of both service contracts.

- **Seismic Data Reprocessing:** Following a competitive tender process, DUG Technology Ltd, based in Perth, was awarded the US$1.45 million contract to reprocess more than 4,000 sq. km. of legacy 3D seismic and selected 2D lines. The contract includes an optional Elastic Full-Wave Inversion (FWI) module valued at US$ 768K. The project is expected to deliver fast-track products within six months and the final pre-stack depth migration (PreSDM) datasets within 12 months. The reprocessed seismic data will support the further delineation of the Halcon Prospect, reassessment of the Dabakan and Palendag discoveries, and maturation of other exploration prospects within the service contract areas. Initial reprocessing results are expected in early 2027, with the complete dataset anticipated by mid-2027

- **Halcon Prospect:** Following a more detailed review of the available seismic data obtained from the Philippines Department of Energy and the engagement of a sedimentological expert to assess analogues from recent discoveries in nearby basins, Tetragon's recent evaluation has significantly increased the prospective resources of the Halcon Prospect. The updated estimates were announced by Tetragon to its stockholders through a release to the Australian Stock Exchange (ASX). Philodrill made a parallel disclosure to the Philippine Stock Exchange (PSE).

  The revised gross prospective recoverable gas resources are as follows:

Resource Category	Previous Estimate	Updated Estimate
Low-case (1U)	188 BCF	1.7 TCF
Mid-case (2U)	2.6 TCF	8.0 TCF
High-case (3U)	19.9 TCF	22.6 TCF

  The geological chance of success has improved from 18% to 24%.

- **Farm-out Strategy:** Parallel to the technical programs being undertaken in the two SC blocks, Tetragon intends to pursue farm-out opportunities with international companies to secure funding participation for exploration drilling. A successful farm-out could help advance the drilling program to test and prove the identified resource volumes.

- **2027 Work Program and Budget (WP&B):** During the Partners' meeting held in Manila on September 18, 2026, Tetragon presented and discussed the initial draft of the 2027 WP&B for the service contracts. In response to the Partners' request, Tetragon will provide an updated report on 2026 budget utilization to facilitate their review of the proposed 2027 budget. The Partners agreed that approval of the proposed 2027 WP&B would subsequently be obtained through a vote by notice. The Operator also advised that Mr. Sam Algar would replace Mr. Conrad Todd as Tetragon's Managing Director, effective September 2026, while Mr. Todd would remain with the company as a non-executive director.

SERVICE CONTRACT NO. 86 (Octon-Malajon)

- **Technical Work Program:** The proposed amendment to the seven-year SC 86 exploration plan, including adjustments to the sub-phase timelines, was submitted to the DOE on September 4, 2026. Under the proposed amendment, Sub-phase I will be extended by one year, bringing its total duration to 2 years, with a revised budget of approximately US$350K. In response to the DOE's request for a more detailed technical work program, Philodrill submitted the additional details on September 14, 2026. The DOE subsequently informed Philodrill that it is endorsing the proposed amendment to the Office of the Secretary for approval.

  Meanwhile, in response to the Request for Quotations for the detailed technical evaluation of the North Block, Philodrill has received separate technical proposals from Qintace Corp., a local company, and Ad Terra Consultancy SA of Switzerland. A proposal from PT Geoservices of Indonesia is also expected. Upon receipt of all proposals, Philodrill will review and evaluate the submissions to determine the most suitable service provider for the assignment.

- **PNOC EC Participation:** The DOE advised Philodrill that the Deed of Assignment arising from PNOC EC's exercise of its option to participate in the SC with a 10% PI continues to undergo review and evaluation.

SERVICE CONTRACT NO. 91 (Cadlao)

- **Cadlao 4 Drilling and Extended Well Test (EWT):** Nido continues with the preparation for the drilling activities. Nido is currently securing permits from government agencies for the SC 91 activities.

- **2027 Work Program and Budget (WP&B):** Nido submitted to the DOE the work program and budget for the drilling of Cadlao-4, consisting of a firm budget of $420,805 and a contingent budget of $37,998,835. Nido plans to drill Cadlao-4 in the second quarter of 2027 using a jack-up rig, which it will convert into a Mobile Offshore Production Unit (MOPU) for an EWT lasting three to nine months. Oil produced during the EWT will be directed to shuttle tankers used for the operation. If the EWT is successful, the MOPU will be replaced by a FPSO unit for long-term commercial production. Nido also plans to drill Cadlao-5 in the second quarter of 2028 to augment production from Cadlao-4 and reach a target total production of 6 million barrels of oil.

PART II – OTHER INFORMATION

There were NO items for disclosure that were not made under SEC Form 17C during the current interim period (01 January to 30 September 2026).

Basis of Preparation and Material Accounting Policy Information

Basis of Preparation
The consolidated financial statements of the Group have been prepared in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

The consolidated financial statements have been prepared on a historical cost basis, except for crude oil inventory which is valued at net realizable value (NRV) and financial assets at FVOCI which are measured at fair value. The consolidated financial statements are presented in Philippine Peso, which is the Parent Company's and its subsidiary's functional and presentation currency, rounded off to the nearest peso, except when otherwise indicated.

The Group has prepared the consolidated financial statements on the basis that it will continue to operate as a going concern.

Basis of Consolidation
The consolidated financial statements comprise the financial statements of the Group as of December 31 of each year. The financial statements of the subsidiary are prepared for the same reporting year as the Parent Company using consistent accounting policies.

New Standards, Interpretations and Amendments
The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of amendments to PAS 21, *Lack of exchangeability*, which became effective on January 1, 2025. The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The adoption of the amendments did not have an impact on the financial statements of the Group.

The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

Standards Issued but not yet Effective
Pronouncements issued but not yet effective are listed below. The Group intends to adopt the following pronouncements when they become effective. Unless otherwise indicated, adoption of these pronouncements is not expected to have a significant impact on the Group financial statements.

Effective beginning on or after January 1, 2026
*Amendments to Illustrative Examples on PFRS 7, PFRS 18, PAS 1, PAS 8, PAS 26 and PAS 37, Disclosures about Uncertainties in the Financial Statements
*Amendments to PFRS 9 and PFRS 7, *Classification and Measurement of Financial Instruments*
*Annual Improvements to PFRS Accounting Standards—Volume 11
- Amendments to PFRS 1, *Hedge Accounting by a First-time Adopter*
- Amendments to PFRS 7, *Gain or Loss on Derecognition*
- Amendments to PFRS 9, *Lessee Derecognition of Lease Liabilities* and *Transaction Price*

- Amendments to PFRS 10, *Determination of a 'De Facto Agent'*
- Amendments to PAS 7, *Cost Method*

Effective beginning on or after January 1, 2027
*PFRS 17, *Insurance Costs*
*PFRS 18, *Presentation and Disclosure in Financial Statements*

Based on the Group's initial assessment, the impact is expected to be limited to presentation and disclosure changes, including the reclassification of income and expenses into operating, investing, and financing categories and reclassification of dividends received from joint ventures and associates to cash flows from investing activities. PFRS 18 does not affect recognition and measurement.

PFRS 18 will apply retrospectively. The Group will be conducting an impact assessment of PFRS 18 and is set to apply any changes to the accounting system to be able to comply with PFRS 18 once the standard takes effect.

Deferred effectivity
*Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

Financial Instruments
A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a. Financial Assets

Initial Recognition and Measurement
Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (FVOCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. Except for trade receivables that do not contain a significant financing component or for which the Group has applied practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price as determined under PFRS 15*, Revenue from Contracts with Customers*.

For a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets to generate cash flow. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortized cost are held within a business model with the objective of holding financial assets to collect contractual cash flows while financial assets classified and measured at FVOCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent Measurement
For purposes of subsequent measurement, financial assets are classified in four categories:

*Financial assets at amortized cost (debt instruments);
*Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments);
*Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments);
*Financial assets at fair value through profit or loss.

The Group's financial assets include financial assets at amortized cost and FVOCI.

*Financial assets at amortized cost. Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents, receivables and other noncurrent financial assets.

*Financial assets designated at FVOCI (equity instruments). Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at FVOCI when they meet the definition of equity under PAS 32 *Financial Instruments: Presentation* and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the consolidated statement of income when the right to payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at FVOCI are not subject to impairment assessment. The Group elected to classify irrevocably its quoted equity investments under this category.

Impairment
The Group recognizes an allowance for expected credit losses (ECLs) for all debt instruments not at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to

receive, discounted at an approximation of the original effective interest rate. The expected cash flow will include cash flow from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before considering any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flow.

ECLs are recognized in two stages. For credit exposures, for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and refundable deposits, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For cash, the Group applies low credit risk simplification. The probability of default and loss given defaults are publicly available and are low credit risk investments. The Group recognizes an allowance based on 12-month ECLs. However, when there has been a significant increase in credit risk since initial recognition, the allowance will be based on the lifetime ECL.

For other financial instruments such as financial assets at FVOCI, the Group applies the general approach where the Group track changes in credit risk at every reporting date.

Exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and reverses any previously assessed SICR since origination, then the loss allowance measurement reverts from lifetime ECL to 12-month ECL.

Staging assessment
PFRS 9 establishes a three-stage approach for impairment of financial assets, based on whether there has been an SICR of a financial asset. Three stages then determine the amount of impairment to be recognized.

*Stage 1 is comprised of all non-impaired financial instruments which have not experienced SICR since initial recognition. Entities are required to recognize 12-month ECL for stage 1 financial instruments. In assessing whether credit risk has increased significantly, entities are required to compare the risk of default occurring on the financial instrument as at the reporting date, with the risk of default occurring on the financial instrument at the date of initial recognition.

*Stage 2 is comprised of all non-financial instruments which have experienced SICR since initial recognition. Entities are required to recognize lifetime ECL for stage 2 financial instruments. In subsequent reporting periods, if the credit risk of the financial instrument improves such that there is no longer SICR since initial recognition, then entities shall revert to recognizing 12- month ECL.
*Financial instruments are classified as stage 3 when there is objective evidence of impairment because of one or more loss events that have occurred after initial recognition with negative impact on the estimated future cash flows of a financial instrument or portfolio of financial instruments. The ECL model requires that lifetime ECL be recognized for impaired financial instruments, which is like the requirements under PAS 39 for impaired financial instruments.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before considering any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flow.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's statement of financial position) when:

*The rights to receive cash flows from the asset have expired, or
*The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred assets and associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

b. Financial Liabilities

Initial Recognition and Measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging

instruments in an effective hedge, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities at amortized cost include trade and other payables, advances from a related party and lease liabilities. The Group did not have financial liabilities at FVPL as of September 30, 2026, and December 31, 2025.

Subsequent Measurement
After initial recognition, financial liabilities at amortized cost which include interest-bearing loans and
borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit or loss.

Derecognition
Financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

Crude Oil Inventory
Crude oil inventory is carried at NRV at the time of production. NRV is the estimated selling price less cost to sell. The estimated selling price is the market value of crude oil inventory based on Platt's Dubai monthly average of the mid-day crude oil prices for the reporting month plus the arithmetic average of Upper Zakkum and Murban and is adjusted taking into account fluctuations of price directly relating to events occurring after the end of the reporting period to the extent that such events confirm conditions existing at the end of the reporting period.

Estimated cost to sell is the cost incurred necessary to complete the sale (e.g., freight charges, transportation costs, etc.).

Property and Equipment
Property and equipment are stated at cost less accumulated depletion and depreciation, and any impairment in value.

Wells, platforms, and other facilities including P&A costs are depleted on a field basis under the unit- of-production (UOP) method based upon estimates of proved developed reserves except in the case of assets whose useful life is shorter than the lifetime of the field, in which case the straight-line method is applied. The depletion base includes the exploration and development cost of producing oil fields.

Wells, platforms, and other facilities include the capitalized plug and abandonment costs for which the
Group is constructively liable.

Depreciation of property and equipment, other than wells, platforms, and other facilities, is computed using the straight-line method over the estimated useful lives of the assets as follows:

Category	Number of Years
Office condominium units and improvements	20
Transportation equipment	5
Furniture and fixtures	5
Office equipment	3

Investments in Associates
An associate is an entity over which the Group has significant influence. Significant influence is the
power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The Group's investment in its associates is accounted for using the equity method. Under the equity method, the investment in associates is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is not tested for impairment separately. Thus, reversals of impairments may effectively include reversal of goodwill impairments. Impairments and reversals are presented within 'Share of profit of an associate and a joint venture' in the statement of profit or loss.

The statement of profit or loss reflects the Group's share of the results of operations of the associates. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the associates, the Group recognizes its share of any changes, when applicable, in the statement of changes in equity.

The aggregate of the Group's share of profit or loss of its associates is shown on the face of the statement of profit or loss outside operating profit and represents profit or loss after tax. The financial statements of the associates are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in its associates. At each reporting date, the Group determines whether there is objective evidence that the investment in the associates is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value and then

recognizes the loss within 'Share of profit of an associate and a joint venture' in the statement of profit or loss.

Deferred Oil and Gas Exploration Costs

Exploration and evaluation activity involves the search for hydrocarbon resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource. Once the legal right to explore has been acquired, costs directly associated with exploration are capitalized under “Deferred oil and gas exploration costs” account. The Group’s deferred oil and gas exploration costs are specifically identified for each Service Contract (SC) area. All oil and gas exploration costs relating to each SC are deferred pending the determination of whether the contract area contains oil and gas reserves in commercial quantities. Capitalized expenditures include costs of license acquisition, technical services and studies, exploration drilling and testing, and appropriate technical and administrative expenses. General overhead or costs incurred prior to having obtained the legal rights to explore an area are recognized as expense in the consolidated statement of income when incurred.

If no potentially commercial hydrocarbons are discovered, the deferred oil and gas exploration asset is written off through the consolidated statement of income. If extractable hydrocarbons are found and, subject to further appraisal activity (e.g., the drilling of additional wells), it is probable that they can be commercially developed, the costs continue to be carried under deferred oil and gas exploration costs account while sufficient/continued progress is made in assessing the commerciality of the hydrocarbons. Costs directly associated with appraisal activity undertaken to determine the size, characteristics and commercial potential of a reservoir following the initial discovery of hydrocarbons, including the costs of appraisal wells where hydrocarbons were not found, are initially capitalized as deferred oil and gas exploration costs.

All such capitalized costs are subject to technical, commercial and management review, as well as review for indicators of impairment at least once a year. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case, the costs are written off through the statement of income and statement of other comprehensive income.

At the completion of the exploration phase, if technical feasibility is demonstrated and commercial reserves are discovered, then, following the decision to continue into the development phase, the oil and gas exploration costs relating to the SC, where oil and gas in commercial quantities are discovered, is first assessed for impairment and (if required) any impairment loss is recognized, then the remaining balance is transferred to “Wells, platforms, and other facilities” account shown under the “Property and equipment” account in the consolidated statement of financial position.

Deferred oil and gas exploration costs are assessed at each reporting period for possible indications of impairment. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case or is considered as areas permanently abandoned, the costs are written off through the consolidated statement of income. Exploration areas are considered permanently abandoned if the related permits of the exploration have expired and/or there are no definite plans for further exploration and/or development. When reserves of oil and gas are identified and development is sanctioned by

management, the relevant capitalized expenditure is first assessed for impairment and (if required) any impairment loss is recognized, then the remaining balance is transferred to oil and gas properties. Other than license costs, no amortization is charged during the exploration and evaluation phase. For exchanges/swaps or parts of exchanges/swaps that involve only exploration and evaluation assets, the exchange is accounted for at the carrying value of the asset given up and no gain or loss is recognized.

The recoverability of deferred oil and gas exploration costs is dependent upon the discovery of economically recoverable reserves, the ability of the Group to obtain necessary financing to complete the development of reserves and future profitable production or proceeds from the disposition of recoverable reserves.

A valuation allowance is provided for unrecoverable deferred oil and gas exploration costs based on the Group's assessment of the prospects of the exploration project.

Revenue Recognition

Revenue from Contracts with Customers

Revenue from sale of petroleum is recognized at a point in time when the control of the goods has been transferred from the Consortium Operator of the joint arrangement to the customer (i.e. lifting), which is typically upon delivery of the petroleum products to the customers. Revenue is measured at amount that reflects the consideration to which the Group is entitled in exchange of those goods, which is the fair value of the consideration received, excluding discounts and other sales taxes or duty. The Group has generally concluded that it is the principal in its revenue arrangements.

Under the terms of the relevant joint operating agreements, the Group is entitled to its participating share in the sale of petroleum products based on the Group's participating interest. The revenue recognized from the sale of petroleum products pertains to the Group's share in revenue from the joint operations. The revenue sharing is accounted for in accordance with PFRS 11, *Joint Arrangements*.

Share in Costs and Operating Expenses

Share in costs and operating expenses include production costs of SC-14 and transportation costs per lifting and ending inventory which is recognized upon the allocation of the amounts mentioned by the SC. Allocation is done by the use of the Group's participating interest in the SC.

Provision for Plug & Abandonment (P&A) costs

The Group recognizes P&A liability where it has a present legal or constructive obligation because of past events, and it is possible that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of obligation can be made. The nature of these restoration activities includes dismantling and removing structures, rehabilitating wells and platforms, and dismantling operating facilities. The obligation generally arises when the asset is installed or the environment is disturbed at the production location. When the liability is initially recognized, the present value of the estimated cost is capitalized by increasing the carrying amount of the related oil assets. Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and

the risks specific to the liability. The periodic unwinding of the discount is recognized in the consolidated statement of income under "Accretion expense". Additional disturbances or changes in P&A costs will be recognized as additions or charges to the corresponding assets and P&A liability when they occur.

Where P&A is conducted systematically over the life of the operation, rather than at the time of closure, provision is made for the estimated outstanding continuous decommissioning work at each end of the reporting period, and the cost is charged to the consolidated statement of income. For closed oil fields, changes to estimated costs are recognized immediately in the consolidated statement of income.
The ultimate cost of P&A is uncertain, and cost estimates can vary in response to many factors including changes to the relevant legal requirements, the emergence of new restoration techniques or experience. The expected timing of expenditure can also change, for example in response to changes in oil reserves or production rates. As a result, there could be material adjustments to the provision for P&A, which would affect future financial results.

Income Taxes

Current Income Tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the tax authority. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the end of the reporting period.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Income Tax

Deferred income tax is provided using the balance sheet liability method on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused tax losses, to the extent that it is probable that sufficient taxable income will be available against which the deductible temporary differences, and the carry- forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred income tax assets is reviewed at each end of the reporting period and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at the end of the reporting period and

are recognized to the extent that it has become probable that sufficient future taxable profits will allow the deferred tax assets to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the end of the reporting period.

Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.
